MOTO-SAW

NEW Electric

SCROLL SAW

Just Guide it

It works like magic! Just imagine an electric scroll saw that is easier to use, yet lighter than a hand saw. Imagine cutting through \(\frac{1}{2} \) medium hard stock a foot a minute, leaving a surface smoother than the finest sandpaper. Here you have all the freedom of a hand saw, yet you can execute the most intricate designs. You can cut at any angle, or even along a spiral twist, as in shaping an airplane propeller. You can use it wherever there is a 110-120 volt 50 or 60 cycle A. C. electric current. Boys from 8 to 80 get a thrill out of Moto-Saw.
