Your Most Important Right
Now that the bandstand has been painted, and the park re-landscaped, we have about the nicest village green in the county.
And it's all because, at the last town election, folks got out and voted—85 per cent of them! That way, they passed the amendment calling for park improvements—over those opposing it.
Reminds you again how important the right to vote is in this country. And it's a right we can retain only by exercising it! . . . like all the other individual liberties—from freedom to enjoy a glass of beer or ale, to a woman's right to vote along with men.
Folks can thank themselves that on summer evenings they'll be able to listen to band concerts in a well-kept park . . . enjoying a bottle of beer or soda pop (whichever they prefer). Because from where I sit, that's a freedom they've earned by exercising a still more important freedom: Voting!

YOU SAVE TIME EVERY MEAL
These wonderful new "Thermo-Kleen" surface cooking units give you clean, cool-kitchen electric heat almost instantly. And the 5 speeds on each element are always CONTROLLED, always the same, to a fraction of a degree. They stay flat, so more of the unit touches your utensils, to give you all-time cooking speed.
EASIEST TO CLEAN
You never again poke, probe or scrape to clean awkward elements. One flick of your finger swings these "Thermo-Kleen" units up out of the way. An easy sweep of your wrist keeps the smooth stainless steel drip pans spotless. They are easier to keep clean than any surface units made. And you have another work saver in the smooth, one-piece, stainproof porcelain enamel top.
COOK AUTOMATICALLY
Wait until you first put your big, new automatic Montag oven through its paces. Its self-minding, timer-thermostat is almost human. You put a whole meal on the safe no-tilt oven racks, set it, forget it. Come back, hours later, and it is cooked perfectly, on time, without watching, without waiting.
INSULATED . . . ECONOMICAL . . . COOL
Baking is a cool job now. A thick, efficient blanket of genuine Fiberglas insulation keeps the heat in, prevents the cool spots that spoil baked things. Saves current, too, besides keeping your kitchen more comfortable.
