Oil Worker Strike Fails to Decrease Gas Consumption

Despite the west coast oil workers' strike and difficulties of maintaining petroleum supplies, September gasoline sales in Oregon closed with a greater increase over last year than any month to date, Secretary of State Earl T. Newbery has reported.

The September figure of 48,173,451 gallons was less than a million gallons under August's record total. It topped September, 1947, by more than six mil-

lion gallons for a 15 per cent gain, compared to an average of 10 per cent for other months.

Fuel taxes grossed \$2,408,672.54, of which approximately 13 per cent will be returned to non-highway users, Newbery reported. Gasoline sales in the first nine months have passed 357 million gallons, with tax collections aggregating \$17,859,094.73, the secretary said.

He pointed out that September also set the year's high in traffic deaths, with forty-eight persons losing their lives in smash-ups. Estimating Oregon motorists had rolled up more than four billion miles of driving by September 30, he reminded drivers of the neces-

From where I sit... by Joe Marsh

"Husbands, Wives, and Marriage"

Maybe you read that survey published recently in a national magazine, entitled "Husbands, Wives, and Marriage."

It showed that among happily married couples, those who criticized themselves outnumbered those who criticized the other person. Among unhappily married couples, it was just the opposite—each one tended to criticize the other.

That's the way it is in our town, as I guess it is in yours. Criticism, whether it's of a wife's taste for hats, or a husband's taste for pipe tobacco and an evening glass of beer or ale, is a sure start towards unhappiness.

As for what made happy marriages, companionship within the home was listed most important of all. And from where I sit, a husband and wife who can spend an evening by the fire—with nothing more exciting than a mellow glass of beer, and a friendly conversation—are a truly well-matched couple!
