Pontiac Has Two "New Looks" For 1949

This is the four door deluxe Pontiac sedan in the Streamline series. Forward thrust has been gained by lowering the hood. Body contour is in the modern manner and yet unmistakably Pontiac. Added safety is compounded by reduced pillars and a curved windshield which gleaming sweep has been increased nearly six inches. Both Pontiac Streamliner and Pontiac Chieftain lines use a 120 inch wheelbase and Hydra-Matic transmissions optional at extra cost.

RANDOM THOUGHTS . . .

Continued from First Page will be in attendance at the banquet. Not only will greater space be needed, but that space must be made comfortable for early December is winter time here regardless of the type of weather in vogue. We should not wait until late fall to get to work on this important piece of business.

Many of our people may not be aware of the fact that Heppner now has taxi service, although the operators, Mr. and Mrs. Jim Lyons, report that business has been good since they opened up

some two weeks ago. The hotel is a handy location for contacting the taxi, either in person or by phone. The fare is reasonable and the service is excellent. It is proving a boon to numerous persons who either are without cars of their own or those who prefer to leave their cars in storage through the winter. Service is the commodity the taxi has to offer; patronage is what the operators have to depend on. Next time try a taxi.

Mrs. Crawford wishes her friends to know that she has sufficiently recovered that her doc-

tor has announced that he will permit her to sit up for an hour or so next Wednesday. She is not planning on resuming any of her activities for several weeks.

Our readers will be pleased to note that Ruth Payne is again contributing a news column to the Gazette Times. Pressed for time, Mrs. Payne had to give up the column early in the fall, but she is in a position to resume this bit of "extra-curricular" activity and, her contribution will be found elsewhere in this issue.

POTATOES AND CHEESE

Potatoes are plentiful and good right now, and homemakers are urged to serve them often. Nutritionally speaking, potatoes are a good buy. They contain valuable minerals—calcium, phosphorus, and iron, as well as small amounts of Vitamin A, thiamin, riboflavin, niacin and Vitamin C.

To keep vitamins and minerals locked inside potatoes, boil them in their jackets. Baking also helps retain the nutrients in potatoes. In addition to vitamins and minerals, potatoes contain some protein. Not very much, but when they are served in combination with other protein foods, they make a delicious and economical main dish.

Potatoes and cheese make a grand main dish combination. Cheese is plentiful and an excellent source of protein, ranking along with meat in this respect. Cheese also contains bone-building calcium. An ounce of cheese (Cheddar) contains as much calcium as a cup of milk. Potatoes and cheese are both versatile foods that may be served in a host of ways—especially in cold weather when hearty meals are so important.

For example, try baked potatoes with cheese this new way for lunch. Served with a crisp vegetable salad, whole wheat bread and butter, fruit and milk, it makes a delicious luncheon dish. Cut potatoes (baked) in half lengthwise, put a thin slice of Cheddar cheese on top, sprinkle with salt and paprika, replace other half to potato, and by the time it is served the cheese has melted.

haupt, agricultural statistician; Chas. W. Smith, assistant director, was in charge of the conference meeting.
