CASE FURNITURE COMPANY

These folks mean business for the West... Pacific Telephone people receive pay adding up to \$19,000,000 a month.

Telephone paychecks also come to you

1. **Timber... paper... copper**—we have to buy many things to build and run the telephone system. Last year Western Electric, our principal manufacturer and supplier, bought over 20 million dollars worth of materials in the West. More than half of each dollar we take in goes for employees. Most of it is spent and goes into circulation where they work and live.

2. **When you add it all up**, you find the money you spend for service comes back, in large part, to you. And your telephone dollars are buying more service than ever. Today you can call more of the people you want to call... more can call you. And your telephone still does its jobs for only a few pennies a call.

3. **More than 80,000** of those whose savings built the business... who own telephone stock... live in the West. In return for the use of their money, a few pennies of each telephone dollar go to them. And as they spend it, they also add to Western prosperity. It would probably be hard to find anyone who does not in some way benefit from the money we spend.

Your telephone is one of today's best bargains

Watch Out For The Symptoms!

Laughed out loud when I heard Foot Davis was down with Chicken Pox. A man of forty-five catching a kid's disease!

So I went to see him, armed with jokes about "second childhood" but forgot them fast when I got there. Hoot looked terrible and had quite a fever.

While we talked, I come to think of how Chicken Pox is a lot like other "diseases"—diseases of the character, such as intolerance, self-righteousness or just plain ignorance. They're excusable in children, but when they come out in

adults they're ten times as bad—and can be mighty "contagious."

From where I sit, we should all watch out for the "symptoms"—little things like criticizing a person's preference for a friendly dinner of temperate beer or ale. We've seen personal freedom wither away in other countries, when individual intolerance was allowed to get out of hand and become a nation-wide epidemic.

Building Oregon Together

These Oregonians are behind three growing enterprises in widely different fields. By taking advantage of Oregon opportunities to better themselves, they help make the whole state grow—creating more jobs, products, services and more opportunities for all of us in Oregon. To make it possible for individuals to more readily help themselves, constructive banking services are made widely available by banks in the First National Group. Thus we help Oregon grow—family by family, farm by farm and business by business. We invite you to come in soon and tell us how we can help you.

"LET'S BUILD OREGON TOGETHER"

MAKES TANKS AND OREGON JOBS

Approximately 30 sheet metal workers, machinists and welders are busy at work in the large Oak Street Tank & Steel plant in Ashland. This Oregon business was born in 1940 when Harry R. Morris (above) began making oil storage tanks in his father's garage to meet local demands. Today Morris' company makes tanks of all kinds, specializing in septic tanks; manufactures a motor steam cleaner for vehicles, and builds metal special ties. The firm's aluminum rowboats are popular on Rogue River Valley streams and lakes. For his company's banking needs, Morris uses constructive service of the Ashland Branch of First National

JENKS HATCHERY STILL GROWING

When Mr. and Mrs. Enoch M. Jenks (right) started a chicken hatchery in 1910 on the pioneer Jenks family ranch near Tangent, their kerosene incubators held 250 eggs. Today, with sons Marlowe (left) and Melvin in charge, the hatchery's automatic electric incubators take 215,000 eggs (12 tons) at a setting. There are 8600 chickens at the Tangent breeder ranch and 10,000 turkeys on 300 acres near Corvallis. Quality chicks and poults are shipped as far as Hawaii. The Jenks', First National customers at Albany, consider services of the bank's agricultural field men especially valuable in helping their business—and Oregon—grow.

SONS EXPAND MILLING BUSINESS

A flour milling business founded at Island City in 1896 by the late Edward E. Kiddle continues to grow with the Grande Ronde Valley it serves. Present-day operators of the Pioneer Flouring Mills are the founder's sons, Fred E. Kiddle (left) and Merton W. Kiddle. Now there is a second mill at Union; elevators and grain warehouses at Imbler, Elgin and La Grande; and pea processing plants at Island City and Elgin. Approximately 20,000,000 pounds of Oregon flour, alone, is milled annually. Banking services of the La Grande Branch of First National play an important part in the Kiddles' extensive operations.
