

Many People Visit Swanson Home at Lone Sunday P. M.

By MRS. ECHO PALMATEER
Over 200 people attended the open house at the Garland Swanson home east of Lone Sunday afternoon, from 1 to 5 p. m. The new home is one of the finest in Morrow county. The pattern, somewhat resembles a capital I, with wings on either end and the long living-dining room representing the connecting bar. There are three bedrooms, living dining room, kitchen, breakfast nook, utility room, den, two bathrooms and one shower on the main floor and in the basement are the play room, cold storage, extra bedroom and furnace room. There are also a patio, breezeway, a double garage and three fireplaces. The patio is equipped with an outdoor brick oven and barbecue spit.

The Swansons are planning an extensive landscape. Assisting the hosts in receiving guests were Mr. and Mrs. Adon Hamlett, Mr. and Mrs. Verner Troedson and Mrs. Lee Beckner. Mrs. Mary Swanson and Jean Ann Swanson had charge of the guest book and Mrs. Charles Carlson served punch and cookies. Denney Swanson entertained the

little folks and a number of older ones with his electric train. Mr. and Mrs. Swanson wish to thank the people for making the day a success and for the beautiful flowers that were given.

Refreshments were served by Mrs. Swanson, Mrs. O'Connor and Mrs. Milton Morgan.

Morrow County poultrymen can increase egg production about one dozen eggs per hen per year by the use of supplemental protein feeds. This applies to pullets in their first year of lay as well as hens during the second year.

This increased production can be obtained by feeding wheat pullets or moist mash the flock will clean up in 20 or 30 minutes, fed daily at noon throughout the year as a supplemental feed. The pellets or moist mash can be fed on top of the mash in the regular feed troughs. It may be necessary to provide additional trough space if mash is being fed as the regular ration the use of pellets as a supplemental feed requires less labor and is much easier to handle than moist mash.

The 1949 annual meeting of the Oregon Wheat Growers League is an event of the past. Hepner did a good job of providing accommodations and entertaining guests attending the meeting. It appears that many of our farmers missed out on a good program in not attending this meeting, especially the committee meetings of the first day, where much educational discussion was held on all agricultural problems. Of great interest to many was the Production and Transportation committee discussion of wheat varieties, smut and weed control. This committee seemed to draw the most Morrow county people with seven

attending from this county. The majority of these were businessmen, registered during the convention were seventy Morrow county people not all farmers, which isn't outstanding in that we have almost three hundred wheat farmers. Nevertheless, I believe that all who attended were well paid in education for the time spent.

Something can be done for shrubs and trees at this time of year which will be helpful to them not to overlook avoidance of the chore in the spring. Dead, diseased or injured branches should be removed. Most vigorous growing shrubs should have some of the out branches removed each year in order that new ones have room to form. Hedges can be cut back to definite size and form and desired shrubs which bloom in the early spring and summer have set their buds, so late pruning will cause a loss in number of flowers.

Mr. and Mrs. Oscar Veelle, boardman, are the leaders of a Dairy club organized there recently. There are six members in the club with Delores Carlson, Pres. Larry Thorpe, vice president, and Gracia Veelle, secretary. Other members are Viola Worsen, Oscar Veelle, Jr. and Maxine Sicard.

Helicopters' amazing ability is working for Pacific Telephone in some places today...helping stop trouble.

How a new sky patrol protects your calls

1. You really get a bird's-eye view from a hovering 'copter. And it's proving a big help in checking our Long Distance routes... Air patrols watch for leaning poles, soil erosion, settling earth... anything that might cause future trouble. They do it fast, too. In one test, a crew recently checked 276 miles of buried cable route in nine hours; it would have taken about six days by land.

2. On-the-spot delivery of repairmen and materials is another use of the flexible helicopter. Since it can literally drop on a blanket, it comes in handy reaching isolated spots... or when snow or floods make roads hard to travel. Helicopter patrol is another example of how we keep looking ahead for the progressive developments that help keep your service always ready to work for you.

3. Keeping ahead of trouble helps keep your service valuable. Today it's more valuable than ever... the many new telephones that have been rushed in-service make it possible for you to call more of the people you want to call. More can call you. And your telephone is still a bargain in these days of higher costs. After all, a few pennies buy a call.

Your telephone is one of today's best bargains
