People of County Increase Purchases Of Savings Bonds

Release of final figures on sales and redemptions of United States Savings Bonds for 1949 shows that Oregon people made the State Office of the Savings Bonds Division of the Treasury the producer of one of the two or three largest sales volumes in the State by buying the huge total of \$48,919,942 worth of E, F and G Bonds.

In making these figures known to the public, E. C. Sammons, State Chairman, pointed out that the Treasury Department maintains a paid staff of only four persons in its Oregon Savings Bonds office. He emphasized the fact that it would be utterly impossible for a staff of this size, regardless of its efficiency or how hard it worked, to exceed the sales of the Liquor Control Commission or of the several other large Oregon institutions whose annual sales run beyond \$20,000,000.

Mr. Sammons expressed the opinion that this tremendous volume of Savings Bond purchases by Oregonians is attributable to two things. First, to the fact that this method of saving has become a part of the normal way of life of a great many Oregon people; second, to the fact that a very large number of business firms and private individuals contributed in one way or another to increasing Oregon's Bond sales volume. Many individuals gave substantially of their time, hundreds of Oregon firms maintained a Payroll Savings Plan for their personnel, banks continued to handle the sale of roughly 85% of the Bonds purchased within the State without charge, and newspapers, radio stations, company publications and other advertising media contributed time and space towards keeping Oregon people aware of the value of consistent thrift.

Mr. Sammons took this opportunity to express his thanks, as well as those of the Treasury Department, to the Oregon people and business firms who took part in the Savings Bonds Program, thus making this success story possible.

Federal Reserve figures show that Oregonians bought \$36,584,794 in E Bonds last year, increasing their purchase of these smaller Bonds by 2%. A drop in the sale of F and G Bonds, now in an increasingly competitive field was responsible for a drop of 4% in the State's total sales of E's, F's and G's together, when compared to 1948.

Although there were approximately \$7,000,000 worth of Sav-

ings Bonds which matured in Oregon last year, total redemptions in the State, which include these maturities, dropped to \$48,620,000, which is six and three quarter million dollars less than redemptions for 1948.

Final figures for 1949 show that total sales in this County were \$287,412, according to County Chairman Mrs. Elaine George, with 232,686 of these sales being in E Bonds. Redemptions in the County amounted to \$113,741 for 1949. Total sales in the county a year ago were \$235,041 and redemptions were \$135,308, according to George W. Minnaugh State Director.

County Chairman Elaine George and the people of Morrow county were particularly congratulated by State Chairman

Sammons on tying for second place in the entire State of Oregon in the percentage of sales for 1949 with a 22% climb in purchases. Mr. Sammons stated that this increase reserve cannot help but benefit everybody in the County sooner or later. In making these figures known

Trout Eggs Arrive At Willamette Hatchery

The Willamette fish hatchery has received its main allotment of 1,002,800 rainbow trout eggs, the Oregon State Game Commission announced today. The trout eggs were taken from fall-spawning brood stock at the Rock Creek hatchery.

The game commission also maintains fall-spawning rainbow stock at the Roaring River and Oak Springs fish hatcheries.

The eggs obtained from the brood trout are held at the hatchery until the eyes of the embryo fish begin to appear. Snow or ice is then packed around the trout eggs, and they are shipped to trout hatcheries throughout Oregon.

THE MAIL MUST GO

"The mail must go," says W. H. I. Padberg, "and that is why I drive Fords. I had to try out several different makes of cars before I had my eyes opened to the fact that you just can't beat a Ford."

The above picture shows W. H. I. Padberg, local mail carrier, after he had just returned from a long drive over the toughest kind of snow drifted county roads in sub-zero weather.

If you will test drive the new 1950 Ford car it will open your eyes, too.
