### Thousands of hands work when you say "fill 'er up"

Most folks probably think of a corporation like ours in terms of a name... "Standard Oil Company of California."

Actually, a company is people... people working together.

In our case, 27,900 men and women work to bring you the products you buy from us. They each contribute special skills and abilities, live their own lives in many different places. You'll find their houses down the block, pass them on the street, sit next to them at a movie.

In the extremely competitive oil business, it takes a lot of people—working with many expensive tools—to bring you good products at reasonable prices. For crude oil is a bulky, sticky liquid that's hard to handle. Taking oil from the ground, refining it, transporting it and pumping it into your car or oil burner is a continuous job... a job that can be done most efficiently when many people pool many talents within a coordinated organization.

Your progress and oil progress go hand in hand
