Built for tough service — all ways!

CHEVROLET TRUCKS

with Chevrolet's Hypoid Rear Axle

Single-Unit Housing

Here's maximum strength... longer trouble-free service! Chevrolet rear axle housings are formed into tubular steel beams; no bolts or rivets to work loose.

Full-Size Inspection plates

Easy-to-remove, one-piece inspection plate saves time and labor... provides full view of rear axle gears when removed.

Splined Axle-to-Hub connection

Splines—not bolts—deliver the driving power evenly—without strain—on all heavy-duty models. Loose axle shaft bolts and costly grease leaks are eliminated.

Straddle-Mounted Pinion

Gears last longer... pinion gear is supported at each end by ball bearings to keep it in mesh. Adjustable thrust pad prevents distortion of ring gear when starting heavy-duty trucks with heavy loads.

4-Pinion Differential

Load and shock of heavy loads are distributed over four pinions instead of two in all Chevrolet medium- and heavy-duty trucks—for longer axle life and greater strength.

Chevrolet trucks are engineered to "take it" on the roughest, the toughest jobs. The single-unit design housing and splined axle-to-hub connection of Chevrolet's hypoid heavy-duty rear axle mean strength and stamina found in no other truck rear axle in Chevrolet's class. Combine that with other outstanding Chevrolet features... powerful Valve-in-Head engines, Synchromesh transmissions, channel-type frames with alligator-jaw cross members! Here is the truck that can handle tough jobs... America's most popular truck. Come in and see these great Chevrolet trucks today.
