By MILLIE WILSON

Miles Gilman is hard at work varnishing the new grade school room and fixing the new seats. We are sure to be proud of our new school rooms. GOING

GOING

GONE!

These unusual views (1 and 2) were snapped by Tom Wilson as the huge planer and factory building of the Heppner Lumber company burned the night of October 25. The temperature was considerably above normal, one might say, and the photographer ran the risk of singeing his whiskers in his efforts to get a good picture. No damage was done and he got two excellent views of the red demon in action. Louis Lyons came over from Hermiston the next day and "shot" the lower picture which left no doubt about the thoroughness of the fire. A new and better building and plant are now under construction and ere long it will be "business as usual" down at the sawmill.

Telephone service is still a bargain . . . for since 1940, rates have gone up much less than the cost of living.

GOOD FRIEND OF THE FAMILY BUDGET

The telephone actually takes less of it than in 1940

1. Seems like the prices of most things you buy have about doubled, in the last ten years. Among the standout exceptions is your telephone service. There have been rate increases, of course, to help meet increased costs of furnishing service . . . higher wages, higher prices for materials, higher costs generally. But telephone rates have gone up far less than most other things. And that's only part of the story.

2. Telephone installers are making your service a better all-around bargain, too. When you buy a pound of something, you still get sixteen ounces . . . although the price may have doubled. Twelve items still make a dozen. But not so with telephone service. Your telephone dollars buy, on the average, twice as many available connections as ten years ago . . . for we've more than doubled the system in that time.

3. Today you can call more of the people you want to call . . . many more people can call you. And the calls you get are often more important than the calls you make. Yet average telephone rates have gone up less than half as much as the cost of living generally. They're up much less than our costs of providing service. It all comes down to this. Today telephone service can be purchased for fewer hours of work than in 1940. Your telephone is a mighty good friend of the family budget.

Your telephone is one of
today's best bargains
