to make petitions circulate in each congressional district instead of getting names around the crowded market place. Groups that habitually put bills on the ballot by initiative oppose this plan as they want the city tail to wag the state dog. These are the tax spending groups, labor and its satellite farm groups.

Information given out by officials is that a big 72,000 gross truck making the 338 mile run from the Columbia to California pays the state \$18.55. An average car would pay the state in taxes \$1.26. The truck weighs 24 times as much as the car so is taxed at about half as much per mile. My, my, what you can't learn by asking questions.
