How to make good telephone service even better....

Give him time to answer
How many times have you answered the telephone just as someone hangs up? You know it's not always possible to get to the telephone the moment it rings. So best way to make sure you get the person you're calling is to give him a full minute to answer.

Good way to stretch your telephone dollar

When you make a Long Distance call, you can get the most for your money if, ahead of time, you make notes of the things you want to talk about. Then, during your call, jot down the things you want to make sure to remember.

With the right planning, you can say as much in a three-minute call as in an exchange of letters. And did you know you can make a three-minute station call, clear across the country, for just \$2.00, plus tax, after six in the evening.

When you links out
of your telephone cord, you help protect your own service. For too many twists may break some of the tiny wires in the cord, causing you to hear a "frying" noise. Let the receiver unwind by itself... then keep the curls out by remembering not to put a turn in the cord as you handle the receiver.
