

Large Turnout Of Mothers-Daughters At Lone Banquet

One hundred and sixty-one attended the Mother and Daughter banquet at the Co-operative church Friday evening. The tables were decorated with tulips, roses and candles. Several boys wait d on the tables. The following program was given: Invooca-

tion by Mrs. Ray Barnett; welcome by Dorothy Dobyns; response by Mrs. Noel Dobyns; vocal solos, Mother Macree and Mother, My Dear, by Mrs. Fred Hoskins Jr. accompanied by Mrs. Cleo Drake; recitations by Arleta McCabe, Judy Sherer, Katherine Rea and Sherry Corley; reading by Mrs. Omar Rietmann; vocal solo, Blue, Blue Lady, Virginia Griffith; humorous reading by Mardene Baker, and the benediction by Mrs. Frank Engelman. Mrs. Walter Corley presented a bouquet of red roses to Mrs. Elizabeth Campbell, oldest mother present, a bouquet of yellow tulips to Mrs. Adon Hamlett, the

newest mother, and a bouquet to Mrs. Sam Esteb for having the most descendants. Two groups of four generations were present. They were, first, Mrs. D. Akers, Mrs. James Lindsay, Mrs. Earl McCabe and little Arleta McCabe. Second, Mrs. Elizabeth Campbell, Mrs. Arthur Keene, Mrs. L. A. McCabe and Grace McCabe. Each mother and daughter was presented with a corsage which was made by the Garden club, and a program. The banquet, which is an annual affair, is sponsored by the Maranatha club. About 30 attended the first one and more keep coming each year.

The Lone Garden club met at the Omar Rietmann home Wednesday afternoon of last week, with Mrs. William Bergstrom as co-hostess. A flower sale was set for May 17. Mrs. W. R. Wentworth demonstrated making corsages. Refreshments were served by the hostesses.

"What are you doing to save our oil resources?"

People are concerned these days about America's supply of crude oil. They say, "If petroleum resources are beginning to run out, we ought to be careful to make them go as far as possible. What are you big companies doing to save our oil resources?"

Here's the answer to that question. Known crude oil reserves are actually 30% greater today than in 1940. And in addition to making new discoveries, the oil industry—Standard Oil Company of California along with others—is making each well and each barrel of oil yield more and more. Competition makes us produce and refine efficiently. Here are some of the ways we do it:

I'd Like to Know...

You may have heard that a suit has been filed by the Antitrust Division in Washington to break up Standard of California as well as six other West Coast oil companies. Many people have written us protesting this action, and many have asked pertinent questions about our activities. We answer all letters individually, but some points seem of general interest. We take this way of discussing them for everyone. If you have a question, we urge you to write:

"I'D LIKE TO KNOW"
Standard Oil Company of California
225 Bush Street
San Francisco 20, Calif.

Remember the gusher? Years ago new wells were allowed to erupt. But oil men found ways to stop this waste. And now they extract three new fuels from the gas mixture.

We also prevent waste! Tapping oil pools which used to be out of reach. Through research into drilling techniques we make holes curve, under mountains, for example.

Time was when only natural pressure lifted oil to the surface. Wells often "went flat." We now use h-g systems to pump pressure back in, recovering much oil formerly lost.

Latest techniques help us in warring on waste. Standard uses a new "electronic brain" to compute best way to drill oil fields for greatest yield 25 years or more into the future.

Natural gas, a by-product of oil production, was once merely wasted. But oil companies long ago learned how to capture it, put this energy to work, and conserve natural oil resources.

And research in refining helps. In 1920, Western refineries were getting less than 7 gallons of gasoline from each barrel of crude. They now get 20 gallons of far better gas.

STANDARD OIL COMPANY OF CALIFORNIA • plans ahead to serve you better

THESE ARE THE FEATURES TO LOOK FOR IN SPRINKLER IRRIGATION!

86 Years of Experience in Farm Equipment Stand Behind the Designing of WADE RAIN...

- To Insure Your Crops Against Drought.
- To SAVE YOU TIME, LABOR AND WATER.
- To Increase Yields, Quality and Profits!

The LEADER in FEATURES

- QUICK, POSITIVE COUPLER.** Self-locking from carrying position. Saves walking and stooping.
- MAIN LINE VALVE.** Holds water in Main Line while laterals are being changed.
- LIGHT WEIGHT ALUMINUM.** Permits handling two 20-foot sections of pipe.
- CONTROLLED FLEXIBILITY.** "Double-Pressure-Seal" Gasket allows ample flexibility on rough, rolling ground. Gasket can't blow out or be forced out by pipe.
- UPRIGHT STABILITY.** Lateral lines locked in upright position.

WADE RAIN Sprinkler Irrigation

PLAN NOW! Our Irrigation Technician will be glad to visit your farm to help you plan the right layout to fit your farm and crop requirements.
