Re-routing Long Distance circuits—one of the many interesting, vital jobs for women in the telephone business.

THE GIRLS BEHIND EACH TELEPHONE "HELLO"

Theirs are important jobs—and they do them well

1. Here's one business where the spotlight's really on women. Because of the nature of telephone work, nearly two out of every three telephone people are women—a high percentage. And they must be capable, well-trained women to handle your calls efficiently and serve you well in our offices. We train them, at our expense of course. And they earn good money in this important work.

3. It would be hard to imagine work for women today more important than a job in our nation's telephone service. For now, more than ever, our country needs swift, reliable communications to help speed the job of defense. And it's reassuring to know that in these days of high prices on most everything, you still get a bargain when you buy telephone service. Here in the West, on the average, telephone rates are up less than half as much as the cost of living.

2. Practically every sort of job—from accounting to teaching—can be found in our business. In addition to good pay, the girls have the security of the company-paid Benefit Plan and enjoy holidays and vacations with pay. All know they have a good chance to advance as their ability grows. Perhaps the best evidence of the importance of women to us is that hundreds have management jobs.
