How to make good telephone service even better.

You speed Long Distance service when you place your call by number

In these busy telephone days, when so many calls that help build our nation's strength are going over Long Distance lines, you'll find your operator can give you much faster service on your out-of-town calls if you give her the number you want rather than just the name and address. That way, you see, you won't have to wait while she calls "Information" to get the number you're calling. So why not start your own out-of-town number list right away?

best way to keep

out-of-town numbers is in a handy booklet, kept near your telephone. One way to get the numbers is by asking your friends for their number whenever you're in touch with them.

Varicolored Vacation View

Out of the misty, purple depths of Grand Canyon of the Colorado in Arizona rise varicolored mountains more than a mile high. This panorama from the north rim shows the view summer vacationists receive of the age-old efforts of erosion. The play of brilliant sunlight and soft shadows on the red and brown rock produce ever-changing scenes that awe the beholder with its beauty and immensity. On the very edge of the north rim comfortable accommodations at reasonable cost are provided in cabins and Grand Canyon Lodge.
