From where I sit... by Joe Marsh

The Cow That Can't "Run Dry"

Sandy Johnson showed me his Jersey cows last week. It was a warm day and they were all under the trees near a watering trough. And darned if one cow wasn't pumping water into the trough! It's a fact—she'd raise the pump handle with her nose, and use her throat to push it down again. "That's Mabel," Sandy explained as she moved away. "Sometimes they drink that trough dry, and she's learned how to fill it again. But she doesn't know her own strength—turns the place into a swamp if we don't watch her."

From where I sit, Mabel isn't the only one who sometimes doesn't know where to stop. For instance, people often carry personal opinions too far—like the person who wants everyone to accept his choice of political parties, or ball-players . . . or beverages. I prefer a glass of beer with my meals. I know that a lot of other people prefer milk. But nobody ought to insist on "herding" others around to his way of thinking.

SAFEGUARD
their Condition
with
LARRO

... and get Top Production Top Profits too!

You can't get sustained milk production . . . nor top profits . . . from your cows unless they're in top condition. To safeguard their condition, they need the full nutrients balance that Larro Dairy Feed provides. It builds strength and vitality . . . it helps cows develop husky calves and produce their full inherited capacity of profit milk. Thousands of actual Herd Check Profit Records prove that Larro, fed the Larro Way, pays a handsome profit over feed cost. Let us show you how to get these extra dollars from your cows.
