

Civil Service Jobs Open in Northwest

Federal civil service announces an examination for appointment to the position of Internal Revenue Agent and Special Agent (Tax Fraud), \$3825 a year, in the bureau of internal revenue in the States of Oregon and Washington. Further information and application forms may be obtained from the Secretary, Board of U. S. Civil Service Examiners, at any first or second class post office, or from the director, eleventh U. S. civil service region, 302 Federal office building, Seattle 4, Washington.

Applications should be filed with the board of U. S. civil service examiners, bureau of internal revenue, Securities building, Seattle, Washington.

Mrs. Edna Turner has returned from Portland where she has been attending the summer session workshop at Washington High School. This workshop is sponsored by the University of Oregon and the Portland Public School. Those attending are given University credit.

Among those attending the annual pioneer picnic held near Fossil Sunday were Mr. and Mrs. Dewey Britt and Mrs. Mildred Tucker.

Huston-Wells United In Home Wedding Fri.

The marriage of Miss Bette Wells and Lionel Huston was solemnized at a ten o'clock ceremony Friday morning at the Spalding home on Gilmore Street. Elder Don Spalding of the Seventh Day Adventist Church read the single ring service in the presence of a few relatives and friends. Miss Marlene Porterfield was the bride's only attendant and Darrel McLachlin was best man. For her wedding the bride wore an afternoon frock of navy blue sheer with white accessories and a corsage of pink rosebuds.

Following the service, Mrs. Spalding served refreshments.

The bride is the daughter of Mrs. J. J. Wells. She is a graduate of Heppner High School with the Class of 1951. The groom is the son of Mr. and Mrs. Orlin Huston and is employed at present by the Farley Pontiac Garage.

Farewell Party Held For Mrs. O'Connor

Mrs. J. J. O'Connor was the honoree at a farewell party Wednesday afternoon for which Mrs. Carl McDaniel and Mrs. Nels Anderson were hostesses. The party was held at the McDaniel residence on N. Main street and each guest brought a dish to well for Mrs. O'Connor. Invitations were extended to Mrs. Frank E. Parker, Mrs. Robert Wagoner, Mrs. Victor Groshens, Mrs. Kenneth Keeling, Mrs. Ray Bailey, Mrs. Tom Harris, Mrs. Ray Quackenbush, Mrs. William Labhart, Mrs. Alvin Bunch, Mrs. Agnes Curran, Mrs. Tom Howell, Mrs. James Hager, Mrs. J. G. Thompson, Jr., Mrs. Hal Whitbeck, Mrs. Francis Cook, Mrs. Clarence Johnson, Mrs. Hensy C. Hoppold, Mrs. Tress McClintock, Mrs. Harry Munkers and Mrs. Earl E. Gilliam.

Mrs. O'Connor plans to leave Heppner about August 5 for Fallon, Nevada to make her home.

RETURN FROM HONEYMOON

Mr. and Mrs. Jack Ployhar, nee Colleen Prock, returned to Heppner Friday from a brief honeymoon trip following their wedding in Portland early last week. He departed Sunday for Virginia where he is stationed with the U. S. Army. Mrs. Ployhar plans to remain in Heppner for the present and continue her work at

NEW PP&L PROJECT TO BOOST NORTHWEST KILOWATT SUPPLY

Work on PP&L's \$26,450,000 Yale Hydroelectric Project on the Lewis River 40 miles north of Portland is being pushed forward 24 hours a day. The power to be produced is so important to the area and the nation that the development has been given high priority by the Defense Production Administration.

Yale's 100,000 kilowatts will be a timely addition to Northwest power supply. The project is to be completed within 18 months—in time to produce power for the 1952-53 winter peak load season.

More significantly, the Yale plant's greatest output will come during the winter months, when demands are heaviest on the Company's system and throughout the Northwest Power Pool, of which PP&L is an integral part.

Drainage area of the Lewis River, on the western slope of the Cascades, has high winter precipitation and normally heavy stream flow during the peak power load season. Thus plants like Yale and its downstream teammate, the 100,000-kilowatt Merwin Project, ideally supplement the large Federal projects on the Columbia River, which has its lowest flow in midwinter.

DIVERSION TUNNEL is being driven 1500 feet through solid rock. Lewis River will flow through this 30-foot-high tunnel while dam and powerhouse are being built.

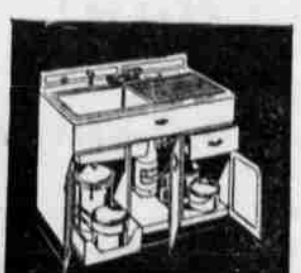

You can afford a dream kitchen—Now!

It's a GLORIOUS day when you get your new white-enamelled steel kitchen! This beauty has 66" twin-bowl Kitchenaid cabinet sink with the famous Mullinaider electric garbage disposer. It can be yours!

Why delay? You can afford that lovely white-enamelled steel Youngstown Kitchen now!

And what a beauty! Super storage space and generous work surfaces to speed every kitchen chore! Food preparation and dishwashing are easier—a breeze, thanks to the Kitchenaid cabinet sink. And the Mullinaider electric garbage disposer ends garbage forever!

Let us show you your new kitchen in miniature. No costly remodeling; easy terms. See us today!

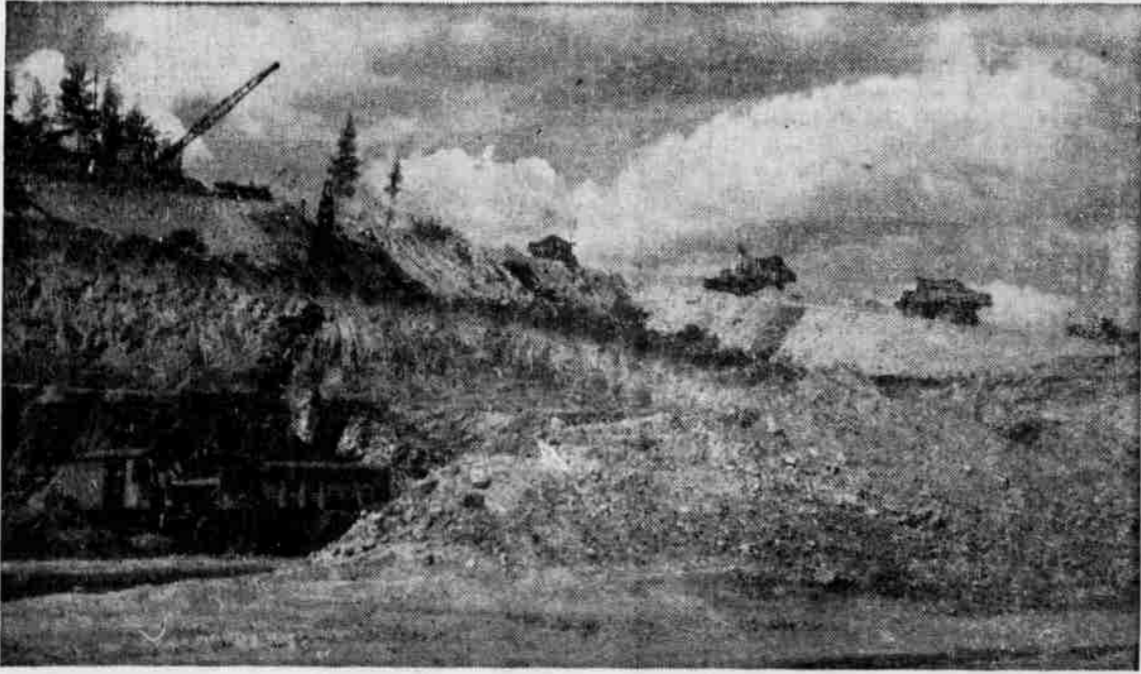

Build your kitchen around a Kitchenaid-Mullinaider Combination. This 48" twin-bowl model (one of 10 models) has sliding-removable drainboard of acid-resisting porcelain enamel and laundry-deep (11") second bowl.

"We Have Got It—Will Get It—Or Its Not Made"

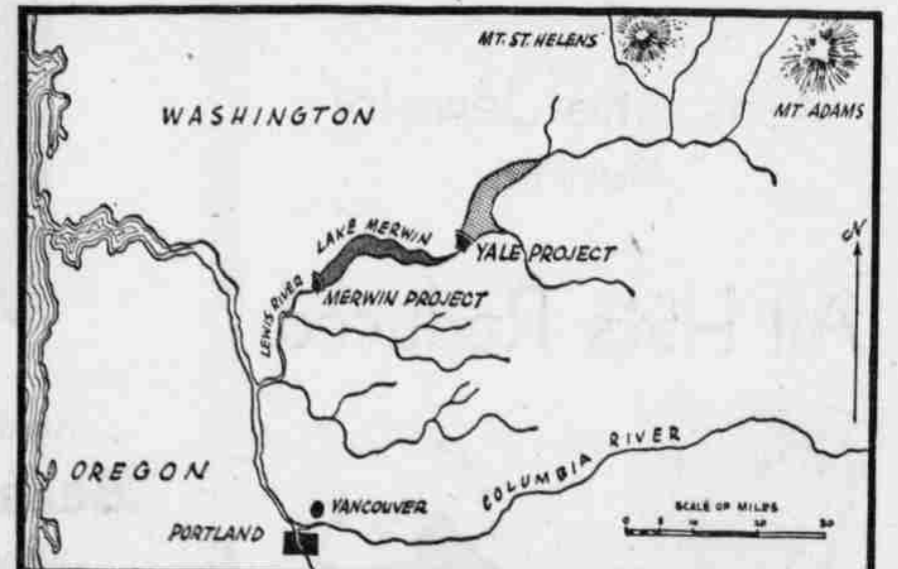

WORK AT MANY LEVELS prepares site for dam construction. Batteries of floodlights are used to illuminate the scene for night work. More than 3,000,000 cubic yards of rock and clay will go into the main portion of the dam. On completion, the main Yale dam section will be 300 feet high, 1500 feet long at the crest.

MORE THAN 800 MEN are already at work on the Yale development. Mt. St. Helens dominates the scene where a new 9-mile lake will store water for power.

ARTIST'S SKETCH shows how Yale will look on completion. Spillway section at left will be concrete, main section will be rock fill. Generators will be in powerhouse at right. Yale Project, operated in tandem with Merwin plant downstream, will produce an estimated 550,000,000 kwh. of electricity annually.

YALE SITE is immediately above the Company's 100,000-kilowatt Merwin development on the Lewis River, about 40 miles north of Portland. Both plants benefit from heavy winter rainfall. Output of the new plant will flow through interconnected transmission systems, to bolster service throughout the Pacific Northwest.
