New Pontiac Gets Customer Attention

"Public reaction to new '52 Pontiac models has never been better than that evidenced at the initial showing early in Decem- ber", Jim Farley, Pontiac dealer at Heppner, declared today, re- porting exceptional attendance. "Our showroom was crowded at announcement time, and en- thusiastic people keep coming in. The new cars are receiving as thorough an inspection as I can recall over many years of new model introductions," Mr. Farley said. "The average American seems never to lose interest in automobiles and what the auto- mobile industry is doing to pro- vide improved personal trans- portation for him." Mr. Farley said that Pontiac is especially a focal point this year because of new engineering de- velopments, "dual-range" driving through the use of higher com- pression engines, new dual-range hydra-matic transmissions and an economy rear axle gear ratio. He explained that these elements comprise an entirely new Pontiac power train which permits maxi- mum flexibility and economy in performance from congested city traffic to open country driving.
