Ann was fascinated by her introduction to a busy telephone office.

Ann White—and the Spirit of Service

Ann White could be the girl next door... or any of the thousands of capable young women who decide each year to make their first job a telephone job. Her first day was exciting, and a bit bewildering, as she began her training as an operator. But soon she gained confidence, learned to meet many situations with poise and skill. She began to feel the importance of getting every call through... the "spirit of service" shared by telephone people everywhere... the feeling which is perhaps the most important ingredient of good telephone service.

One unforgettable day, not long after she began handling real calls, a frightened little voice on Ann's line cried: "I'm lost. Could you find my Daddy for me?" Ann did, of course. Such things often happen in the telephone business, and often we receive grateful letters telling us about them. We like to hear these good reports about our operators, our installers, and others who meet our customers directly. For they tell us that you recognize the "spirit of service"... so much a part of day-to-day telephone work... so important in making your telephone ever more valuable to you.

Your telephone is one of today's best bargains

You can seldom put a price tag on a telephone call... for it may save a life, close a business deal, or it may be just routine. But it's good to know that, even in these days of high prices on most things, your telephone service remains one of today's best bargains.
