Capable hands of telephone operators are ready to get your calls through—when and where you want.

No one can guess the importance of the calls which will flow through the cable these linemen are installing.

When trouble strikes, telephone men get going fast to keep your telephone always at your service.

Making it pleasant for you to do business with us is the aim of our business office people who serve you.

## Their work keeps our nation united

75,000 Pacific Telephone people are helping make us a nation of neighbors

Perhaps never before has every job done by the men and women on the telephone team been so important to our country. In countless ways, the nation is using the telephone to get things done faster—in defense plants, among our armed forces, on the everyday jobs of all Americans. One of the reasons why we can outproduce any other country is that we have more telephone service, and better telephone service. This service would be impossible without the skill and devotion of the people who work to provide it.

Re-routing Long Distance circuits is one of the many interesting telephone jobs for women. . . . 48,000 women in the West. And that they like their jobs is demonstrated by the length of time they have stayed in telephone work—longer than seven years, on the average. Among telephone men, the average length of service is now nearly twelve years. Together, telephone men and women account for more than two-thirds of our total operating expenses (in wages, benefits and provision for service pensions). We do all we can to make telephone jobs good jobs. . . . the kind that attract and keep the capable people so important to good telephone service.

### Your telephone is one of today's best bargains

In 1951, our total wage costs came to more than a quarter of a billion dollars—nearly ten times that of ten years ago. Yet in spite of higher wages, higher taxes, higher costs of everything we need to provide service, we've kept telephone rates one of the best buys in our budget today.
