Silicones Are Versatile New Family

Women who wield a dustcloth can give thanks to industry for discovering the very versatile family of silicone compounds, and adapting a member of this family for use in a polish that beautifies furniture while it makes dusting easier.

Within the family of silicone compounds are members which do such practical and diverse things as waterproof fabric, keep eye glasses sparkling clean, weatherproof your house's face, and help your car give more satisfactory service.

In furniture polish, silicones do equally practical things. New non-oily silicone polish makes surfaces so smooth that dust glides off at a touch of the cloth. It is easy to use, and more important, it makes fine finishes so mirror-bright you can see your image in them. And its beauty lasts and lasts - for months.

Expanding industrial uses of silicone compounds will touch your home life more and more in the future - and brightly - but there is no need to wait for easy dusting and furniture beauty. Non-oily silicone polish is available now in handy 10-ounce bottles at your grocery, hardware and department store.

Mr. and Mrs. Allen Case and Mrs. Edward Schaffitz and her mother, Mrs. Ida J. Grimes of Portland, returned Saturday evening from Seattle where they spent the past week attending furniture market.
