New Idea For Outdoor Corn Roasting

NOW IS THE TIME FOR ROASTING-EARS. This delicious summer treat is always better when cooked and eaten out doors. A new, and easy way to roast corn is in a Nesco electric roaster-oven. The portable electric roaster-oven, long a summer favorite for indoor cooking, is now being used widely out of doors, either on the picnic table or on its own cabinet.

A favorite way to roast sweet corn-in-the-husk is as follows:
Preparation—Select large, freshly gathered ears of corn that are fully developed, tender and uniform. Remove top layer of husk only. Cut off tassel and peel back entire husk to stem in three sections. Remove silks and cut off tip end of corn. Rinse in cold water allowing a little moisture to remain on corn. Replace husk on corn for protection.
Roasting—Arrange 12-18 ears of prepared corn in bottom and cross-rack (3rd position from bottom) of roaster-oven "Handy-Lift" rack. Place full rack in roaster-oven which is preheated to 400 degrees. Adjust vent to closed position; roast 45-50 minutes; and serve piping hot right in husks. Butter or margarine are all that need to be added to make this a perfect summer time dish.

old Stevens brought him over last Friday. They were just in time to take Mrs. Musgrave back to Heppner for a tetanus shot. She had stepped on a nail. Mr. Musgrave drove to Hardman that evening to bring her home.

Fair-Minded

(Each week the Gazette Times will run a suggestion by the Morrow county Fair Board on possible exhibits for this fall's fair. It's just a reminder of ways you can help make a bigger and better fair).
 How about floats for the parade? They are work but do add that finishing touch to any parade. Also, believe there could be more Western flavor added by fixing up some of these old buggies and sees laying around in barn lots. Might be fun!
