When you are not feeling up to par, do you prescribe your own medicine? Do you also prescribe your own insurance?

Drug ads often tell of symptoms which may justify purchase of the preparation. In some cases, you may be lucky and get immediate relief by treating your own ailments. However, the wisest course, the safest for those concerned with their health, is to consult a doctor. In any event, if you guess wrong, as many do, you'll need him anyway. Sometimes it is too late.

Likewise, some people guess at their own insurance requirements. Instead of a bottle of aspirin, they'll ask for \$2000 fire insurance. No consideration is given to their actual hazards and needs. Not only is the amount frequently skimpy but many times important coverages are missed. Too late they learn of available protection which they should have had.

We are skilled in diagnosing your insurance condition, and prescribing the proper care. Let us help you analyze your insurance. Why guess, when our professional counsel is free?
