Short story of a long shopping list

If you were to jot down all the different kinds of goods and services Standard Oil Company of California buys, your shopping list would be about 50,000 items long. Over the years, we've been growing as a customer as well as a supplier here in the West.

But the most important aspect of our "shopping," we believe, is where we do it. You might think that a large company like Standard would centralize its buying in a few metropolitan areas. Actually, our purchases are made in hundreds of Western communities. The almost infinite variety of Standard's needs—from paper clips to propellers, from produce to professional services—has made the Company an important factor in the economic well-being of Western towns and cities.

Last year Standard was a very good customer for a great many firms—more than 10,000 large and small suppliers, to whom we paid more than \$125,000,000. We've always bought locally wherever possible and practical. We do it not only because it's good business for Standard, but also because it helps the growth of the West. We know that our long-run prosperity depends on that of the communities we serve.

From groceries to drilling pipe, Standard's purchases in local communities mean business to merchants all through the West.

We buy building materials—lumber, roofing, plumbing, carpentry, and supplies for our oil fields, refineries, plants, and offices.

We also use the services of doctors, nurses, pharmacists, lawyers, engineers, surveyors, drilling contractors, and many others.
