How to make tractor-track bearings last longer

You can add many hours of life to your tractor's track-roller bearings if you lubricate them regularly with RPM Tractor Roller Lubricant. It flows evenly to all bearing surfaces and coats them with a tough, wear-resisting film that stays on even in sidehill operation. It also forms a tight seal at bearing edges that helps keep out dirt, mud, and water.

RPM Tractor Roller Lubricant comes in three grades for Caterpillars to meet all operating conditions, and in a special A.C. Type for Allis-Chalmers. Ask us to deliver you a supply today.
