Special Notice to County Wheat Growers

Dr. Schaefer is shown here making snow in a home freezer in the General Electric laboratory. This was one of the major experiments which proved that weather modification was feasible.

Dr. Vincent J. Schaefer

General Electric Research Laboratory Weather Scientist

WILL SPEAK AT THE

ANNUAL MEETING

OF

Tri-County Weather Research Inc.

Tues., June 30--Igo Grange Hall, Condon

Dr. Schaefer, the man who discovered the method for producing snow and rain for the General Electric Company, and who is recognized as outstanding for his contributions to the science of meteorology, will be one of the main speakers at the annual meeting June 30.

The General Electric company is in no way

connected with any weather development company but is doing continuing work on weather research, which places Dr. Schaefer as one of the best informed men in America in this field.

In addition Dr. Fred Decker of the OSC physics department will report on precipitation and the techniques which will be used this year

in preparing a final report on evaluation studies.

This meeting is of vital importance to all ranchers and all are urged to attend and to take part. Directors will be elected, and there will be NO SOLICITATION at this meeting which will start at 10:00 a. m. at the Igo Grange hall, 5 miles west of Condon.
