The recipe for comfortable "al fresco" dining during the summer months should include a grouping such as the one shown. Light and cheerful, the table's plastic top and tubular metal frame will take a lot of abuse. The woven fibre of the seats and backs of the chairs are not harmed by driving rain or blistering sun.

Tables and chairs have self-leveling glides on the legs to compensate for the type of flooring found in terraces and patios.

Bright colors and smart designing give the right touch to modern outdoor living at moderate prices. You can furnish your outdoor living area as tastefully as the indoors.

This group includes occasional tables and lounge chairs. In good taste and extremely flexible, this furniture was designed to be used outdoors in the summer, and if you wish, in the recreation room during the winter months.

What did we ever do before the days of that handy little gadget, the potato peeler? Latest thing it's called on for in my household is to pare asparagus. And what a quick and efficient job it does!

And now that we've found a new way to prepare asparagus, let's find a new way to sauce it, like this: Combine 3/4 cup real mayonnaise, 1/3 cup milk, 1/4 teaspoon salt and 1/4 teaspoon white pepper and cook over low heat 5 minutes, stirring constantly. Add 1 tablespoon lemon juice and 1 teaspoon grated lemon rind just before serving, hot, over asparagus. Add a bit of chopped pimiento if you like.

So far most of the interest on summer jewelry is centered on earrings. Giant hoops, of imitation gold, are about the most popular ones on the New York scene. Some are almost as large as bracelets!

For your file of useless information: They say goats — yes, goats — are responsible for the discovery of coffee. Seems that a goatherd noticed his charges cutting fancy capers after munching berries of the coffee tree, so he sampled some himself, liked what he had and thus started coffee on its way to the table.
