Most-liked low-priced car

... among people who want more for their money when they buy ... and more money when they sell!

There's a big reason why more folks are buying more Fords than ever before. No other low-priced car offers so many of the things people want and need for today's driving. In fact, to get such "Worth More" Ford features as a V-8 engine, completely automatic transmission and fine-car power steering in any other car, you'd have to step well up from the low-price field.

Of course, Ford owners will discover that Ford's worth more when they sell it, too. Surveys of used car prices show year-old Fords returning a higher proportion of their original cost than any other car.

because it's most like high-priced cars

... more and more people are considering Ford as the one fine car in the low-price field!

It's hard to believe that a car which is built like the finest still sells in the low-price field. Yet a Ford with its hulltight Crestmark body, its Full-Circle Visibility (most in its field), its new fine car ride and roomy luggage locker (roomiest in its field) delivers at a figure that keeps it right down in its price class.

Ford's the only low-priced car which offers you a choice of a completely automatic transmission (Fordomatic), Overdrive or Con-

ditional Drive. And Ford Master-Guide, available on all V-8 models, is the last word in power steering ... makes turning up to 75% easier, yet retains the natural feel of the wheel on the straightaway.

FORD

Ford's V-8 is the same type of engine powering America's finest (and costliest) cars. And Ford's Mileage Maker Six is the most modern Six in the industry.
