### PP&L Employees Hear Of Plans For Power Development By Co.

Plans under study for the development of 1,181,000 kilowatts of generating capacity by Pacific Power & Light company and three neighboring utilities to support the rapid growth of the area were outlined by Paul B. McKee, president, at an annual meeting of eastern Oregon and Washington employees of the power company Tuesday evening at the Grand Hotel in Walla Walla.

The meeting was one of a series being held throughout the Pacific service area honoring the company's 2234 employees and their wives and husbands. Total service for the entire group represents 22,343 years.

The proposed power developments, McKee said, include 536,000 kilowatts at Bruce Eddy and Penny Cliffs on the Clearwater river, 350,000 kilowatts at Noxon Rapids on the Clark Fork river, 200,000 kilowatts on the Lewis river, and 95,000 kilowatts on the Santiam river.

"We are also very hopeful that an additional 1,000,000-kilowatt development may soon be started at the John Day site on the Columbia river as a result of joint efforts now being made to get that project started," he declared. This same group of companies, he said, also are working with the Atomic Energy Commission in an

Sherwood, were visitors at the Pete Haynes home on Sunday and Monday.

A school picnic was held on Friday, celebrating the last day of school for this term. The teacher, Mrs. Elsie Greenfield has moved to Fossil, where Mr. Greenfield has work.

The Stalligs sawmill is running again after the three day holiday. Logs are being hauled from the Joe Boyer mountain home in Boon Canyon.

Mrs. Tom Perry is visiting her sister, Mrs. Perry Crenshaw and family at Lebanon. She accompanied Mr. and Mrs. Robert Rogers, on their return trip home.

Mr. and Mrs. Glenn Hayes made a trip to Heppner Sunday afternoon, for a short time.

John Madden has moved his sheep to Montana for the summer. He is expected home within a few days.

Sheep shearing is finished at the Pat Campbell ranch, and the shearers moved to Enterprise, where they have a long run of shearing.

Miss Martha Campbell has returned home from Hermiston, where she has been teaching in the grade school. Mr. Pat Campbell returned home from Portland Saturday, where he had medical attention for his eyes.

investigation of the possibility of a nuclear power plant for the production of electric energy.

"Just how far in the future it will be before an atomic power plant is developed in this area no one can now say," he pointed out, "but it is significant that construction of a 60,000-kilowatt atomic power plant already is under contract between the Atomic Energy Commission, the Duquesne Light company and Westinghouse at a site near Pittsburgh, right in the center of the nation's great coal fields."

Speaking of the recent merger of Mountain States Power Company with and into Pacific Power & Light, McKee said, "It puts behind our local operating organization the pool of financial and physical resources of the two companies and will greatly strengthen their ability to keep up with the rapidly growing service requirements of 285,000 customers."
