Savings Bonds Sales Take Jump

The people of Oregon made another spectacular purchase of U. S. Treasury Department E and H Savings Bonds during August, according to Mr. E. C. Sammons, Chairman of the State Savings Bonds Committee, who released sales figures for last month today.

Savings Bonds sales in the state totaled \$3,295,511, a jump of over a million dollars over the same month in 1953. The increase amounted to 47%, and was again achieved in the face of the lumber industry strike.

County chairman, Jeff Carter said that plans are now underway for an all out effort for the remainder of the year to reach Oregon's quota of \$37,500,000. Treasury Department officials, he said, emphasize in the strongest terms the needs of re-financing increasing maturities of War Bonds through the sale of Savings Bonds. Old timers will remember that the VI War Loan Drive occurred in the fall ten years ago, and it was at that time that the high point was reached in the Wartime sale of E Bonds.

The Treasury Department therefore hopes that its volunteer

Savings Bonds Committees all over the country will make a special effort to increase their sales during the period of the Tenth Anniversary of the VI War Loan Drive. Sales through August 31 in Morrow county totalled \$129,586 compared to \$141,537 for the year of 1953.

YES, WE'RE "HELPING BUILD OREGON TOGETHER"....

REGARDLESS OF SNOW, RAIN OR SUNSHINE, 750 MILLION QUARTS OF MILK

are delivered in Oregon each year to countless housewives, grocers, restaurants, bakeries and other users of milk.

About 30 per cent of the food we use is milk itself or has milk as an ingredient. The Grade A label on your quart of milk stands for highest quality. It can only be used if all requirements of the U. S. Health Grade A Milk Ordinance as well as the City and State Grade A milk ordinances have been met. A fair price for Oregon Grade A Milk producers makes this possible.

Nearly one person out of every 15 Oregonians is employed the year around in Oregon's Dairy Industry, and their purchasing power is vital to you as a consumer as well as a taxpayer.

Back of every quart of milk lies the prosperity of whole communities of our state. Country towns flourish only when agriculture products sell at a fair price. In turn these small towns keep the wheels of industry turning in our cities and help give thousands of fellow citizens steady employment.

In order to safeguard Oregon's 70-million-dollar Dairy Industry, the legislature enacted the Oregon Milk Marketing Act. Due to this law the farmers' share of the consumers' dollar has increased from 39% in 1933 to 56.14% in 1954. Yet milk is today the best and cheapest food your money can buy. This law is essential to our health as well as the economic welfare of our state. It is beneficial to producers and consumers alike.
