WHAT'S DOING

D. A. Short, your Telephone Manager for Heppner

Now your voice can answer the telephone when you're away

Scene: an office. Nobody's there. But when the telephone rings, a voice answers: "This is GArden 6-8049. We'll be back at 3:30. Would you like to leave a message?" This is our new automatic answering and recording equipment at work. When you're away, it automatically "answers" your telephone, gives callers your recorded message. When you return, it plays back their replies. You can get this handy equipment through your telephone business office. It's one more way we've found to make your telephone more useful... while still keeping it low in cost. Pacific Telephone works to make your telephone a bigger value every day.

Help yourself to even faster long distance service

One of the big advantages of long distance service is that it saves time—helps you do things in a hurry. This service works even faster for you if you give the operator the telephone number of the person you're calling, not just his name and address. In fact, your calls go through twice as fast. So for the very best long distance service, please call by number.

Extension telephones add so much to modern living... yet cost so little

Here in the Pacific West, where pleasant, relaxed living is now a custom, extension telephones are fast becoming a "must" in more and more homes. And small wonder, because they add a truly modern touch to your home. Located in your garage, basement, or workshop... in your bedroom and kitchen, extensions save you steps, save you time. And this extra convenience is yours for just pennies a day. So ask your telephone business office about extension telephones for your home. Pacific Telephone.
