

Boardman Accident Hurts Two Indians

By Mary Lee Marlow
(Too Late for Last Week)

When Walter Hayes went to get his car out Sunday about 8 a. m. he found a man asleep in the back seat. Upon investigating found the man to be an Indian from The Dalles who had started the evening before to go to Idaho in his car accompanied by another Indian. He was in a dazed condition and did not know just where he had left the car and companion. Said he had crawled into the car to get warm when he couldn't arouse anyone at different houses. Hayes called the state police who finally discovered the other man and the car in the gravel pit east of town. They had missed the road and overturned in the pit. Both men were injured and the police took them to the Good Shepherd hospital at Hermiston.

The second month of the fish derby sponsored by the local commercial club ended with a fisherman from Gresham winning the first prize, Dale Bergh, whose steelhead weighed 18 pounds. Bob Miller was second with one weighing 17 pounds,

and Delbert Carpenter third with one weighing 15 pounds.

SLEEK NEW STYLING and record-high horsepower make the Buick Special four-door sedan for 1955 a standout in the lower priced field. Its V-8 power plant has been increased to an all-time high of 186 horsepower which, with Buick's new Variable Pitch Dynaflow transmission, gives the Special performance and maneuverability unequalled by

any automobile in its field. Setting a new styling trend are a wide-screen grille and a roll-edge bumper with sturdy dual wing guards. For the first time, Buick's choice selection of power assists—power brakes, power steering, window lifts and front seat adjustment—are available as optional equipment on the Special.

THREE GOOD BULLS

AS GENERAL ELECTRIC SEES IT...

Every year Americans live better because electricity costs so little

These 30 everyday General Electric appliances lined up on the front lawn dramatize the impact of low-cost electricity on American life. Per capita use of electricity in U.S. is 2 times Britain's, 5 times Russia's, 167 times India's.

An average U. S. family uses enough power each day to equal the energy output of 35 hard-working men

Nowhere on earth has electricity been put to work more widely than in the United States, and its price been kept so low.

We've come a long way since Thomas Edison invented the first home use of electricity — an electric light — just 75 years ago. There are three reasons for this progress.

First, America's electric utilities have invested in facilities (\$18 billion in the last ten years!). And the electrical industry has steadily increased the efficiency of power equipment. Turbine-generators made by General Electric, for example, produce 10 times more electricity per pound of coal than

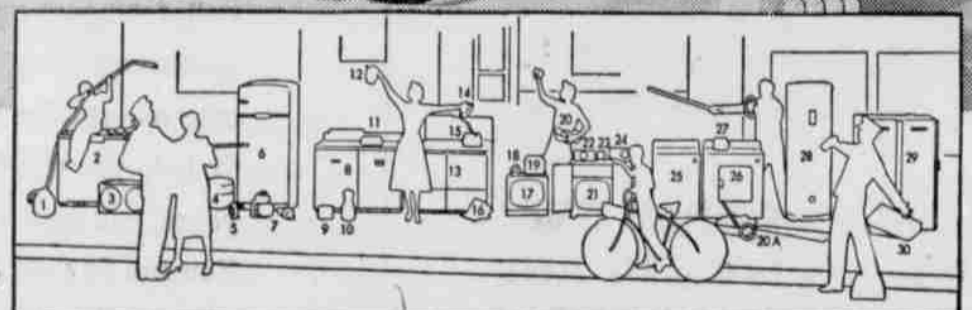

Edison's original generators.

Second, appliances have been constantly improved and are mass-produced to bring their price within reach of everyone. The first 60-watt lamps cost about \$1.00 and gave a light equal to 7 candles; a G-E 60-watt lamp today gives a light equal to 67 candles, and costs only 19 cents.

The third reason for progress is our free economy, which has allowed industry to grow, create jobs and produce effectively for everyone's benefit. As we see it, it adds up to a good example of progress in the American way.

Meanwhile, we're hard at work to make the future even better.
