WE LIKE TO HELP FOLKS BUILD

All this - and more miles per gallon too!

Be sure to test out the phenomenal effect of "variable pitch propellers" in Dynaflo Drive!

So Buick engineers asked themselves—"If you can do it with air, why can't you do it with oil—the oil inside a Dynaflo Drive?" And to make a long story short—they could, and they did.

They designed and engineered the propeller-like blades inside the "stator" of a Dynaflo Drive so they can change their pitch as much as 75 degrees. That provides one setting for more miles-per-gallon, and another for an instant safety-surge of power when it's needed.

All you have to do is push the accelerator pedal down to the last half-inch beyond the full throttle position—and a-way you go!

Of course, there's a lot more to make a visit to our showrooms the "must" of the new-car year.

There's a step-up in styling as sensational as the step-up in power.

And the step-up in horsepower is this: 236 in the ROADMASTER, SUPER and CENTURY—188 in the low-priced SPECIAL.

But the thrill of the year is Buick's latest engineering "first"—and what it does for the man or woman who drives the latest and greatest Dynaflo Drive.

Pay-off on progress!
Buicks today go a lot farther on a gallon of gas, thanks to constant improvement in Dynaflo and in engine design. Even the new 236-hp ROADMASTER averages 4.8 more miles per gallon than Buicks of six years ago.

Thrill of the year is BUICK
