Turkey Dinner
Planning a turkey dinner for Christmas? If you are, and you want to be sure it's a "good" bird when you place it on the festive table, then follow these tips in preparing that important part of your holiday meal.

Be sure all wing-tip feathers are removed. They may be pulled out easily by pressing the skin between the feathers down to the tips of the quill with the forefingers of one hand and pulling the feathers straight out with the other.

The drum stick can also be greatly improved by pulling with a pair of pliers as many of the nine heavy tendons in each leg as possible.

Singe your bird the easy way. Put a few teaspoons of rubbing alcohol in a jar lid, light, then rotate the turkey slowly over the flame. The bird should then be washed with soap in lukewarm water, using a scrub brush, then rinsed in clear water and dried.

Don't stuff the turkey until just before putting it into the oven. Three skewers should be used before closing the cavity and a square knot tied after each skewer so the lacing won't tighten. If there is not sufficient opening to let off steam, the dressing will get soggy.

In roasting the turkey, you'll find that the wing-tips can be brought over the back and tied to make a "rack" on which the bird will rest in the roaster.
