Left-over wire gets new lease on life

In the telephone business, we call the wire that leads from your telephone at home to the pole outside a "drop" wire. Maybe you've seen some of our men putting up drop wires around town. If you have, you probably noticed that a few short pieces were left over on some of the jobs. Now, these odds and ends of wire weren't of much use until recently. It was too costly to splice them together. But now an economical way has been found to join drop-wire scraps into long, continuous pieces which can be put to work. Naturally, this is a big cost-cutter... one that helps us as we work to keep down the prices you pay for service. Pacific Telephone works to make your telephone a bigger value every day.

Home's never very far away by telephone

Just because Dad's out of town on business, he needn't be out of personal touch with the rest of the family. In just moments, you can all be together again—visiting, laughing, trading the latest news. For even when you're far away, home's as near as the closest telephone. And a visit by long distance is almost like being there in person. It costs so little, too. You can make a three-minute "station" call clear

across the country, after 6 p. m. weekdays and all day Sunday, for only \$2.00 (plus tax). And of course, rates for shorter distances are even less. So let long distance keep you in close touch with your family and friends. It's a pleasure you can hardly afford to miss.

SOME INTERESTING FACTS

Based on the volume of telephone calls business in Heppner is continuing to grow. Calls handled during these winter months have continued high without the usual decrease in usage.

Our Athena, Lexington and Ione customers apparently also appreciate the value of our long distance service. Did you know you can call New York from these exchanges for as low as \$2.00 plus tax, or Seattle for only 60 cents.

We can install a BIG STEP-SAVING extension in your home for only \$1.25 per month. You will find it worth many times over this amount.
