J. Wayne Green, eminent Trichologist, demonstrates causes of baldness and how it can be prevented

How To Have Hair For A Lifetime To Be Demonstrated Here By Famous Trichologist Offers Written Guarantee

An exclusive interview by Steven Bright

WICHITA (Special) — J. Wayne Green, Director of Rogers, Inc., Hair and Scalp Specialists, exploded the 'myth of baldness' today in an exclusive interview.

"Baldness is unnecessary, costly, and a plague to mankind," says Green. "No man need be bald. No man need suffer the stigma of premature old age that is forced upon him because he is losing his hair. The Rogers method of hair and scalp treatment can prevent baldness—can turn colorless fuzz into healthy, growing hair—can make you look youthful again."

Demonstration To Be Held in Heppner, Oregon

This revolutionary method of home treatment for the hair and scalp will be demonstrated in Heppner, Oregon, Monday ONLY, February 21 at the Heppner Hotel. Trichologist James Wilson will conduct the private, individual interviews from 12 noon until 9:00 P. M. on Monday ONLY. There is no cost or obligation, and you need no appointment.

Reason For Baldness "There is always a reason for baldness," continued this nationally known authority. "Hair cannot grow through a scalp that is infected with dandruff, excessive oiliness, or extreme dryness. A scalp that has never been exercised cannot be expected to produce healthy hair." Men, and yes, women too walk the streets today, completely devoid of nature's greatest ornament—hair. Simply because they were not taught the basic rules of hair and scalp hygiene while they were growing up. "The simple answer," emphasized this expert, "is that children should be taught the same simple basic rules of hair and scalp hygiene that they are taught for the proper care of their teeth. If this were the case, baldness would be a rarity today!"

Heredity Not Involved

Trichologist Green dodged no issues. He quickly took up the most widely spread theory of baldness—heredity. "Mankind's unrealistic belief that baldness is hereditary stems from a misinterpretation of the theory of genetics.

Theory does not state that any person must be bald because baldness exists in the family. What it does say, is that in some families, a tendency exists towards an undernourished scalp."

The purpose of the Rogers Hair and Scalp Clinic is to teach the methods of strengthening the weak scalp and nourishing it to a healthy, vigorous condition. "A healthy scalp will grow hair if it is not already completely bald," assures Green.

Is There Hope For The Completely Bald

In his travels throughout the United States and Canada, Green has collected hundreds of testimonials of his ability to develop weak fuzz into healthy, mature hair. All of his clients have started with a private examination, hair and scalp analysis, and a diagnosis of the disorder. Green is quick however, to tell a hopeless case that he cannot be helped. "We strongly advise," says Green, "that no person who is completely bald hold any hope whatsoever of regrowing hair. If there is any fuzz at all, we can restore a healthy scalp condition and the hair will grow normally again as nature intended."

Offers A Guarantee

"Rogers, Inc., America's Foremost Hair and Scalp Specialists, offer a guarantee to any client who enrolls for treatment. If he or she is not completely delighted with results at the end of 30 days, the money invested will be graciously refunded," pledged Green. "We must have satisfied clients. We must grow hair. After all, it is our best advertisement."

Is Your Hair Healthy?

If you have a scalp disorder, or if you are worried about your hair, call Trichologist James Wilson at the Heppner Hotel, in Heppner, Oregon, Monday ONLY from 12 noon to 9:00 P. M. The public is invited. The examinations are private and open to men and women. You do not need any appointment, and you will not be embarrassed or obligated in any way.
