Published Every Thursday and Entered at the Post Office at Hepner, Oregon, as Second Class Matter  
Subscription Rates: Morrow and Grant Counties, \$3.00 Year; Elsewhere \$4.00 Year. Single Copy 10 cents.

## People Have Made Oregon, Let's Have More of 'em!

We couldn't help but get just a little bit disgusted last week when we saw the statement one of our state senators made while discussing a legislative bill proposing that the Oregon Development be allowed to spend \$20,000 for advertising the state. We don't remember his statement word for word, but it was to the effect that it would be better to use that amount of money to help the state get rid of a few surplus people, rather than invite others to come to Oregon. The senator seemingly prefers to have the beauties of his state remain untouched and unviewed by anyone other than himself and a limited number of other "native Oregonians." Isn't that being a little selfish?

The state of Oregon and many local agencies are spending many thousands of dollars each year inviting people from other parts of the nation to visit the state which we believe offers more scenic attractions than most any other, with the hope behind it all, that some of those visitors will like the state well enough to decide to make it their home, bringing with them their skills and knowledge and, quite frequently, their own financing. Every chamber of commerce in Oregon is doing its utmost to encourage more people to come to its community knowing that only from people comes progress and increased business for every merchant and businessman.

Only by wanting will Oregon continue to pro-

gress, and we don't think that the people of Oregon have yet gotten to the point that they no longer want. Senator Gill inferred that Oregon doesn't want any more people. We don't think that is true.

## A Job Being Well Done

The nearly 300 4-H club members in Morrow county are joining this week with more than two million other members in America in observing National 4-H Club Week—when members make special effort to show the public the things they have been doing and learning during the year. Many of these numerous projects are now on display in store windows in every county community and represent considerable effort on the part of our 4-H clubbers.

The education and training these boys and girls get does much to get them started in life and their program is based on their pledge which says: "I pledge—my Head to clear thinking, my Heart to great loyalty, my Hands to larger service, my Health to better living, for my club, my community, and my country."

One of the main points emphasized in 4-H club work is that whatever project is started by a member, should be completed. That type of training is something we all could use more of.

For the incentive to complete more than 90 percent of all projects started, Morrow county 4-H members and their leaders deserve much credit—not just during this week, but continually.

news paper, you are reminded to attend. The demonstration will be held on Friday with two scheduled for the day. The first will be at the Oscar Peterson farm south of Ione, where a young orchard, its care, management, and pruning techniques will be demonstrated. In the afternoon, an old unkept orchard at the N. C. Anderson home in Hepner will be the subject of discussion and demonstration techniques.

On Tuesday of this week, approximately 40 commercial spray operators, county weed supervisors and state highway department crews from Morrow, Gilliam and Wheeler counties, met to discuss spray programs, old and new chemicals, how they are used, and ways of reducing spray hazards. During the day those who will have occasion to apply chemicals during the season were given an examination that is required of all spray operators. The exam was given by Ray Kelso of the State Department of Agriculture. This meeting held for the first time in 1954, gives

those working with sprays an opportunity to understand the complexities of sprays and the need for using them wisely.

Several weeks ago, we discussed in this column some of the problems and their solution to getting the most from the least moisture if conditions remain such as they are. Moisture conditions have improved somewhat however they are a long way from adequate moisture for most rapid growth, especially under dryland conditions. A meeting that has been held for many years, is that of the Water Forecast at which time moisture outlook for the coming year is discussed between those agencies which are concerned. This year because of the moisture situation, the meetings have been set up to be of interest to everyone.

The Water Forecast meeting for the water shed area that will affect Morrow County, will be held at the Vert Memorial Building in Pendleton on Monday, March 14. Included to be discussed along with the water for-

cast for the area, are possible crop adjustments under irrigation, water management, soils in relation to water and relationship between winter moisture supplies and wheat yields. Dr. Carl Larson, superintendent Hermiston Branch Experiment Station; Merrill Oveson, superintendent Pendleton Branch Experiment Station; Marvin Shear, Irrigation Specialist, Oregon State

College; Fred Tleston, Assistant Irrigation Engineer; and Jack Frost of the Soil Conservation Service will appear on the program. Those interested are urged to attend. I will have room for several to ride with me if interested. The meeting will last from 9:00 to 3:30 p. m.

From where I sit... by Joe Marsh

## Uses His Head Saves His Feet

Nobody around here can remember when Pop Turner wasn't our town's postman. He must have been toting that big, heavy mail-sack since Pony Express days. That's why it's sometimes a shock to see him these days pulling his mail bag around in a "caddy cart," a sort of light wagon that golfers use so they don't have to carry their clubs. "Folks sometimes holler 'fore' at me and ask me how my game is," Pop reports, "but I'm not ashamed to learn something new. Just wish I'd thought about these

golf gadgets years ago!" From where I sit, it's good to see someone come up with a new wrinkle—keeps us from feeling too regimented. For instance, perhaps you've always felt that hot milk is the only thing to drink at bedtime. Then someday you meet a fellow who prefers a cold glass of beer. Well, that's his choice—and certainly he's entitled to it. We can't expect everyone to follow our old habits to the "letter."

## WANTED WANTED

AT LEAST \$600 PER MONTH

OUR business is spreading like WILDFIRE. It's an ideal BUSINESS for the average man and wife team. Age up to 60. We need your Time YOU need OUR business. You operate—from YOUR OWN home. No high overhead. NO products to lie in your garage or basement—NO stores to service. NO equipment or products to buy. THIS is the BUSINESS that mushroomed so fast, that it ROCKED the entire EAST. NOW it is HERE. YES here in the NORTHWEST. To be offered to qualified parties who want to have better than the average INCOME and can handle a moderate investment in a depression PROOF sure thing. If YOU want to enjoy SECURITY for you and your family, and YOU mean BUSINESS, answer this "AD" Tell something of yourself, address, phone number. WRITE to Box TH, this paper.

## From The County Agent's Office

By N. C. Anderson

From visiting with some of our livestock men during the past year or a year and a half and the casualties they have had from cattle drinking post preservative treatments, it might be timely to remind those who have not learned from first hand experience that a barrel of post preservative liquid where cattle can get to it, could be costly. We know of at least eight cattle that have been killed during the past

year from drinking this solution. While the post preservative itself is claimed not to be poison, the diesel or stove oil mixed with it can cause digestive disturbances that kill animals two ways. They might be killed immediately or linger for several weeks before dying. Keeping your post preservative barrel in an enclosure away from cattle might save you hundreds of dollars.

Morrow County farmers who banded together twenty-five years ago to solve their problems of grain marketing will get together on April 5th in observance of the silver anniversary of the Morrow County Grain Growers. This cooperative has had its ups and downs like many farmer cooperatives have but we know that if all of the money which has been gained through this organization was distributed among our people, that it would amount to a greater savings than the majority of our farm people realize. The silver anniversary banquet should arouse much interest and do much to review accomplishments that some may have forgotten.

For those who might have missed getting a letter or reading of the pruning demonstration in this

## THIRTY YEARS AGO

From Files of the Gazette Times March 12, 1925  
Edward Chinn and wife and son Daniel returned home on Sunday evening from Portland.

Mrs. Laxton McMurray of Ione was a visitor here for a short time on Friday being accompanied by her parents, Mr. and Mrs. Low.

Spence Crawford departed for Arlington late last evening, his destination being Eugene, where the conference of the Oregon Editorial Association is on for the last two days of this week.

W. F. Barnett, who was here from Lexington on Friday, reports that the grain on his farm north of Lexington is all up and growing well.

The Arion Literary Society of the high school has selected the following to membership in their society: Merle Becket and Leonard Schwarz.

## Spray Roses Now!

WITH MILLER'S

# POLYSUL

Liquid Lime Sulphur With Spreader

## The Choice of Experienced Gardeners

Now is the time to spray roses and other flowering plants and bushes with dormant spray. Applied now to rose bushes it destroys mildew spores. All trees and shrubs that drop their leaves in winter can safely be sprayed with Miller's Polysul.

HEPPNER HARDWARE & ELECTRIC

Loyal Parker

## STAR THEATER, Hepner

Admission Prices: Adults 70c, Students 50c, Children 20c including Federal Excise Tax. Sunday shows at 2 p. m., other evenings at 7:30. Boxoffice open until 9.

Thursday-Friday-Saturday, March 10-11-12

### HANSEL AND GRETEL

In Technicolor. Electronically-controlled dolls make up the cast of this distinctively different motion picture. They walk, talk, sing and dance through one of the world's most famous folk tales, to music by Humperdinck. Because of its appeal to children, this feature will be shown first each evening.

Plus

### THREE HOURS TO KILL

In Technicolor, with Dana Andrews, Academy-Award-Winner Donna Reed, Dianne Foster, Stephen Elliott. A distinguished mystery western. Interesting for every variety of motion picture taste.

Sunday-Monday, March 13-14

### THREE COINS IN A FOUNTAIN

In CINEMASCOPE and Color by Deluxe, with Clifton Webb, Dorothy McGuire, Jean Peters, Louis Jourdan, Maggie (The Moon is Blue) McNamara, Rossano Brazzi, Howard St. John. Offstage rendition of title song by Frank Sinatra. You just ain't livin' if you don't react enthusiastically to the boundless merits of this thoroughly delightful, warm and engrossing comedy, told against the enticing backgrounds of Rome and Venice. One of the features nominated for the Academy Award for "Best Picture of 1954."

Sunday Shows at 2 p. m., 4:20, 6:40 and 9

Tuesday-Wednesday, March 15-16

### BEAU BRUMMELL

Eastman Color Photography-Technicolor Print. Stewart Granger, Elizabeth Taylor, Peter Ustinov, Robert Morley. The grace, charm and daring of George Bryan Brummell lead him into some highly dramatic moments and romantic interludes.

## There's even more to Chevrolet styling than meets the eye!

This is beauty with a bonus... for Chevrolet styling is designed to add safety and comfort while you drive, and to return greater value when you trade.

Truly modern lines are shaped by usefulness. You can see what we mean in the deep crystal curve of Chevrolet's Sweep-Sight windshield... a dramatic style note, certainly, but one that stems from the need for wider, safer vision. Or take high-set taillights—they add to the impressive length of line... but they are up where they can be seen for safety's sake.

The smart louvers across the hood aren't just decoration... they mark the intake for the High-Level ventilation system for cleaner, fresher air. And the whole shape of the body—its lowness, the dipped belt line—is merely a reflection of a lowered center of gravity, the added stability.

This is truly functional styling that serves you better every mile, and preserves its value against the distant day when you trade. This is Body by Fisher—another Chevrolet exclusive in the low-price field. Come in and let us demonstrate that this new Chevrolet is just as exciting to drive as to look at!

## motoramic CHEVROLET

STEALING THE THUNDER FROM THE HIGH-PRICED CARS!

Again in 1954—for the 19th straight year—MORE PEOPLE BOUGHT CHEVROLETS THAN ANY OTHER CAR!

# Fulleton Chevrolet Company

1 Visored headlights

2 Louvered High-Level air intake

3 Sweep-Sight windshield

4 Distinctive dip in belt line

5 Fender-high taillights

6 Tasteful two-tone color styling
