

# Airforce Boys Lose Belongings In Boardman Fire

**By Mary Lee Marlow**  
The house owned by Earl Cramer, and occupied by three members of the airforce, was gutted by fire last Saturday afternoon about four o'clock. A/2c Robert Kilgore, who was in the house alone at the time, was asleep and was awakened by the fire which was thought to be started by the explosion of an oil heater. Kilgore was burned on the hand and ears. A/2c Richard Price and A/2c Jerry Jerome, the other occupants of the house, were not home. The boys lost all their clothes except what they were wearing. The new fire truck recently purchased by the city was called and kept the fire from spreading to other nearby houses. A strong wind was blowing at the time, and without the truck the fire could have caused a lot more damage than it did.

Ronald Black, FFA instructor, took four members of his class to Central Point last week to attend the state FFA convention March 15-18. The boys going were Bill Coder, Larry Eades, Gary Moore, and Bud Douthitt. Mrs. Black and daughter Diane accompanied them and went to Philomath to visit at the home of Mr. and Mrs. Walter Turner, and to Delake to visit at the home of Mrs. Crystal Barlow and Mr. and Mrs. Albert Ball. They all returned home Saturday.

**From where I sit... by Joe Marsh**

**Finally Talked Herself Out**

A certain talkative young lady almost spent a night locked in "Doc" White's drugstore.

She entered Doc's store about 11 P.M., going directly to the pay phone. At eleven-thirty Doc went home—not having seen a customer for a half hour. Around midnight he got a call from the store... she had finally run out of conversation (and money) and found the front door locked tight.

Doc vowed he'd leave her there to teach her a lesson. But Mrs. W. spoke up: "Now you go turn her loose. It's hard to cut a good conversation short—something only a woman understands!"

From where I sit, however, plenty of men are as hard to pry away from a telephone as any female. Some people are just naturally long-winded, while others are the silent type—just as some of us like coffee and others prefer a glass of beer. The important thing is to be considerate... before friends start giving us the "busy signal."

**LESTER WYMAN SAYS:**

**Spring Wheat Shows Big Response To Brea Aqua Ammonia Plus Sulfur**

DID YOU KNOW THAT: (1) According to the California Bureau of Chemistry, California growers used more than three times as much aqua ammonia (20-0-0) the first 9 months of '54 compared to the same period of '53? (2) The rate of increase was 26 times that of any other non-solution type of nitrogen fertilizer? (3) At the same time, Aqua jumped from 5th to 2nd place in total tonnage? Shows what can happen when you take the lift and lug out of fertilizer handling with low-cost fertilizer samples-in-solution. I like to tell my customers that "with Brea Aqua you don't lift anything heavier than the end of a two-inch hose!"

OUR DRILL APPLICATION RIGS are doing a nice job for customers these days, and naturally we are well equipped and ready to handle more customer acreage. Things are happening so fast in the fertilizer business that I know we can save you money and do a better job if you will let us help you with your nitrogen needs.

BREA AQUA AMMONIA stores well in the soil, and because of its long lasting qualities can be applied successfully during spring ploughing for winter wheat. Many of our grower customers save considerable time and money by combining application with other cultivation operations.

PEAS AND SWEET CLOVER also show a good response to Brea Aqua Plus Sulfur. Our field service men will be glad to work with you on programs for these important crops.

More and more local grain producers are boosting yields and profits with Brea Aqua Ammonia Plus Sulfur (18-0-0-2.) Both experiment station and grower tests show remarkable response of Northwest grain to Brea's low-cost, high-performance nitrogen solution with sulfur added. Brea Aqua Ammonia Plus Sulfur is a "natural" for grain. It combines speedy, mechanized fluid handling with shallow drill application which soaks nitrogen and sulfur into the soil at just the desired number of pounds per acre. Shallow "soak-in" application of Brea Aqua at depths of only 4" keeps maximum moisture in the soil and places nitrogen where it is immediately available for germinating spring wheat. Nitrogen closer to the surface boosts young wheat when it needs it most and gets it off to a fast healthy start.

For more information and help in planning your nitrogen schedules for spring grain . . . call us today. We'll be happy to show you how Brea Aqua Plus Sulfur pays for itself over and over again. You'll like our fast service, low cost, and the big pay-off in crop response.

Just call us and we'll come out and show you how Brea Aqua Ammonia can make more money for you.
