Atomic Power For Better Living

An artist's drawing of the first nuclear reactor to be put to work by private industry for improving a wide range of consumer products.

The first nuclear reactor to be owned and operated by private industry to produce atomic energy for peaceful, civilian purposes, has been designed and is planned for construction.

The American Machine & Foundry Company will build the reactor at an estimated cost of \$1,500,000. It will be used to develop different and better foods, medicines, textiles, plastics and other consumer goods.

General Walter Bedell Smith,

vice chairman of the board of the company, predicted that the harnessing of atomic energy to the needs of American industry will greatly aid in research and in the production of countless necessities to daily living.

The new plant, to be located on a 250-acre site in New York State, is planned as the first of a number of atomic reactors for industry throughout the country. Representative companies from each industry will use the reactor jointly.

SALES LEADER FOR
19 STRAIGHT YEARS

Are you getting full strength fertilization?

Shell's way is the Sure way

to fertilize with Nitrogen

FIRST-AND BEST-IN AMMONIA FERTILIZATION!

NH₃ (anhydrous ammonia) is the fertilizer richest in nitrogen. Guaranteed 82% nitrogen, it carries more of this vital plant food than any other type of fertilizer. It provides wheat with nitrogen in a form it can use immediately, and maintains a supply of plant nourishment throughout the growing season.

When you buy Shell NH₃, you get the most experienced NH₃ fertilizer service. Trained dealers—with years of Shell know-how behind them—supervise the whole job

for you. These specialists know local crop and soil conditions, use application equipment perfected through years of experience. Shell's way is the SURE way!

Shell NH₃ applications help speed up decomposition of crop residue, improve soil tilth, provide the right amount of nitrogen at planting time to get seeds off to a healthy start. You get healthier stands, yield increases up to 50% or more, and a return of as much as \$4 for every \$1 invested.

Ask us for a copy of the Shell NH₃ bulletin on the SURE way to fertilize wheat.
