Mom and I are playing it smart this year!

"NATURALLY Dad's going to get the special gift that he's been hinting for lately. But this year he's also going to get a gift that won't cost him any money. In fact, it will return his money with interest. 'Cause Mom and I are giving him a U. S. Savings Bond."

This young fellow has a mighty good idea—and one that might help you. Since Dad's biggest concern is his family's security, a Savings Bond is a gift he's sure to appreciate.

And a Bond is one gift that grows more valuable as it gets older. It earns 3% interest, compounded semi-annually, if held to maturity. So by the time this gift is 19 years and 8 months old, each \$1.00 you invested will be worth \$1.80!

Besides that, a U. S. Savings Bond is one of the finest and safest investments you can make, because it's an investment in the future of America. So drop in at your bank today and purchase a Bond for your Dad.

Want your interest paid as current income? Invest in 3% Series H

United States Government Series H Bonds are new current income Bonds in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on one month's written notice. Mature in 9 years, 8 months and pay an average of 3% per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased through any bank. Annual limit: \$20,000.

The U. S. Government does not pay for this advertising. The Treasury Department thanks for their patriotic donation, the Advertising Council and

Exchange of gifts was held and new names were drawn for next year's Sandflower Sister.
