From where I sit ... by Joe Marsh

"Light" Snack For Ducks

Coming back from Balesville the other night I noticed a powerful light at Whitey Fisher's Duck Farm. Seemed to be shining over the water.

I stopped to ask Whitey what went on. He took me down to his pond and pointed out a 200-watt bulb—rigged up on a pole about three feet above the surface. The light was attracting thousands of insects for the ducks to eat.

Seemed kind of odd to me—but Whitey was enthusiastic. "Best idea I ever heard of," he claims. "Keeps the feed bill down—and

the bug population, too. Why do you suppose I never thought of it before?"

From where I sit, Whitey's the type who's always ready to pioneer a worth-while new trick. Me, I stick to old methods. Just a case of personal feeling, I guess... like the way you may prefer coffee with meals while I always prefer a traditional glass of beer. Not that I'd claim you're wrong—respect for the other man's opinion is my "guiding light."
