place. As for consumers, Fair Trade Laws have never estab-Quite a paradox exists. While official pace on adoption of the Hoover Commission reclished prices on commodities, just on certain brands. ommendations to take govern-

ment out of business proceeds at For example, if consumer a snail's pace, there is lots of wants to buy an electric toaster, she can find many brands, with hurry up activity in importuning a wide variance in price range Yet brand she may prefer is sold at one price. If that brand does not offer to her value to justify its price, obviously she doesn't have to buy that brand.

Thus, unless there is some protection against price cutting on those brands, end result will be every manufacturer will com-pete on price basis. This will result, as in Russia, in only shoddy goods being offered for sale. It is also significant that same

housewife cannot shop around for gasoline. She finds same prices all over, yet gasoline is not fair traded. Neither is steel, cement, and many other com-modities. This, too, is similar to Russia, where state sets com-modity prices. In U. S., state does not set commodity prices, but government has been lax in preventing their price fixing. Thus the great inconsistency of

of fair competition, which have become accepted public policy, will be uprooted, changed and the times. Official hearts bleed because certain brands in a commodity group are Fair Traded. weakened to a point where our independent retailers will be at Yet nothing is said by these graat bleedin; heart officials over the fact that on many comthe mercy of predatory, unfair modities consumer must pay the It is interesting to note big drive to repeal Fair Trade laws is based on two slogans. One is same price, regardless of brand.

Thus, leaving commodity price rigging alone, and repealing Fair Trade laws to drive down quality of consumer goods, would give U. S. same system as Russia. That is why some remark face-tiously that Attorney General should place on Attorney Gen-

STAR THEATER, Heppner

Admission Prices: Adults 70c, Students 50c, Children 20c including Excise Tax. Sunday Shows continuous from 4 p. m. Other evenings start at 7:30. Boxoffice open until 9 p. m. Telephone 6-9278.

You'll always REMEMBER SEPTEMBER as a month of superb movie entertainment. Whether its Back-to-School, Labor Day. Morrow County Fair and Rodeo, Our 35th Anniversary or the First day of Autumn, there is day after day of BIG PICTURES!

Thursday-Friday-Saturday, September 1-2-3

DAVY CROCKETT KING OF THE WILD FRONTIER

Walt Disney's perfect blend of historical fact with wonderful entertainment, starring Fess Parker and Buddy Ebsen. In Technicolor. We're giving a free show ticket to every Davy Crockett in the Rodeo Prade, just stop by the theater as soon as the parade is over and get your ticket. Plus

ARIZONA SHEEPDOG

Walt Disney expresses his appreciation to Arthur Allen and his Border Collies, Nickey and Rocky, who made the trek from Arizona's Navaho Country to the high meadows of the San Francisco Peaks for this Technicolor film. Show starts at 7:30

Sunday-Monday, Sept. 4-5

VERA CRUZ

Lightning-paced, action-crammed drama, splendidly performed by a select cast including Gary Cooper, Burt Lancaster, Denise Darcel, Cesar Romero and Sarita In SuperScope and Technicolor. Montiel.

Sunday shows at 4. 6:15 and 8:30

Tuesday-Wednesday, September 6-7

SIGN OF THE PAGAN

Jeff Chandler, Jack Palance, Ludmilla Tcherina. Rita Gam in the story of Attila the Hun. A great novel, a great screen entertainment! In CinemaScope and Technicolor.

Rhea creek journeyed over to the Greenhorns and had a visit with Dan Salter at the Mayflower mine, in which a number of local people are interested as stockholders.

Frank Harwood and Joe Devine returned from a trip to Los Angeles Tuesday morning.

The country home of Mr. and Mrs. C. W. Valentine, about five miles northwest of Heppner, was totally destroyed by fire on last Thursday afternoon while all the family were in town except their son James.

Spencer Crawford drove to Portland on Saturday, where he met his family who were returning from a visit of two months at Berkeley, Calif.

Mrs. Tindal Robison was a visitor in the city from her Eight Mile home on Tuesday.

Les Wyman says:

SHALLOW DRILLING PAYS - Your short-cut to higher profits from in-creased grain yields is shallow-drill application of Rrea Aqua Ammonia, and here's why:

Because Brea Aqua is a nitrogen fertiuizer in solution form, it does not have to be "over-injected" to stay in the ground. As a solution, the fer-tilizer soaks into the root zone and stays there, providing the plant with the proper nitrogen requirements. Shallow drill application also lends itself to a faster, more uniform application without soil and seed bed disturbance. This means that a rig can cover a field faster with less ground resistance on the equipment. Add the features of "soak in" nitrogen together with "ease of application" and they'll total "pro-fit" every time! OUR DRILL APPLICATION RIGS are

doing a nice job for customers these days, and naturally, we are well equipped and ready to handle more custo-mer acreage. Things are happening so fast in the fertilizer business that I know we can save you money and do a better job if you will let us bld on your nitrogen needs.

GROWER OWNED EQUIPMENT -We have noticed that many local growers are considering the advantages of owning their own application equipment Again, Brea Aqua's ease-to-hand-ling soon pays for the cost of the changeover. With high-speed transfer pumps to refill applicator tanks in a few minutes and one man to handle the application, the rig pays for itself over a short period of time. Many Brea growers handle equipment modification in their own shops.

shown in the above pictures, is a new Spring Tooth Modification that does the extra job that puts growth into your top-soil. Note in the closeup of the Spring Tooth that is has been modified to allow a flow pipe to feed the Brea Aqua into the soil during the regular spring toothing operation.

An Old Familiar Spring **Tooth With New Ideas**

An old Familiar Spring Tooth with new Ideas! That's what this new modification amounts to; a modification that saves you an extra trip across the field. Simple to change the Agri-Chem. Spring Tooth, permits normal usage as well as providing a means of Brea Aqua Nitrogen ap-plication into the top-soil. The natural 'soak in" feature of Brea Aqua increases the fertilizing qualities by staying in the soil at root level where it does the most good. The new Agri-Chem Spring Tooth Modification not only saves you time, but conserves moisture in your fields and saves wear and tear on equipment.

 Brea's Agricultural Technical Service of. fers the following recommendations for iryland grain, varying the application acre: 16-23 inches rainfall, use 50-75 lbs. 8:15 inches fainfall, use 30-50 lbs. N per rate with acreage rainfall expectancy: N per acre; about 24 inches rainfall, use 70-90 lbs. N per acre.

For further information and assistance in planning nitrogen schedules farmers are urged to follow the recommendations of their county agent. Call us and find out how we can offer you Brea's highperformance nitrogen solution at low cost per pound of net nitrogen as well as expert service to assure you highest profits for every fertilizer dollar invested.

Just Call Us And We'll Come And Show You How Brea Aqua Amonia Can Make More For You
