

Spectacular air tricks, formations and maneuvers thrilled an estimated 20,000 spectators assembled at Salem's McNary Field and parks on miles of adjacent roads last Sunday. They witnessed the ultra modern in military, civilian and commercial air exhibitions. Included were a spectacular helicopter "sea" rescue pickup, a parachute jump, a simulated carrier landing and take-off by the Navy Squadron, life raft drop by a Piper, and passes by an Air Force B29. The climax was an ear-splitting, smoke-spewing take-off by the jet fighter enroute back to its base.

Governor Patterson headed a large group of state officials and local leaders who almost turned the annual air "brunch" into "Lee Eyerly Day." The governor presented the happy air pioneer with a citation for his half-century of efforts in development of aviation interests in Oregon.

NEW PENAL INSTITUTION
The signing and recording of a deed was completed Monday which transfers a tract of land

14 miles north of Salem to the state as a site for the \$6,000,000 correctional institution to house young offenders. The site, one of 25 offered, was bought for \$70,000, \$175 an acre.

The plant when completed will have a capacity of 600 inmates, with provisions for expansion when required. The institution was approved by the voters at the 1954 general election and received two appropriations by the legislature of \$1,250,000 each.

The board of control which conducted the negotiations will supervise the bids. They expect to have preliminaries cleared within three months.

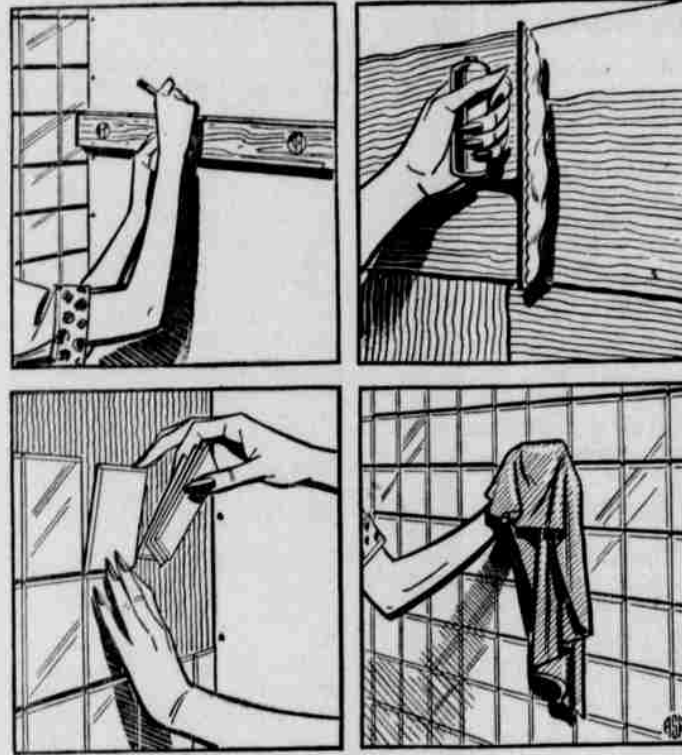

OREGON CHERRIES CLEARED
California authorities have decided to let Oregon growers and shippers send fresh cherries into their state—but not until the 1956 season.

Entry of Oregon cherries has been denied for several years because of the cherry fruit fly in this state. Recent tests, however, have shown that a new fumigation treatment using ethylene dichloride will kill all stages of the cherry fruit fly in the fresh fruits and their containers.

The fumigation must be conducted under official supervision and be certified by the Oregon Department of Agriculture before the Oregon cherries will be acceptable by the California Department of Agriculture.

CHEMICAL PLANT PROJECT

Plastic Tile Makes Remodeling Easy

Homeowners today are doing more of their own home modernizing than ever, and the big reason is the new ease of remodeling, using plastic wall tile. Old-fashioned bathrooms, kitchens, dinettes and other such areas can be converted into brighter, more livable rooms easily and inexpensively by installing plastic wall tile made of polystyrene.

Because plastic tile is light weight, a specially constructed supporting wall is not required—important in renovating an older home. Tile may be applied over smooth plaster, plasterboard, plywood, and many other surfaces. It is not satisfactory to "tile" over rough plaster. Wall-paper or oil cloth must be removed and paste washed off before tiling. Walls must be true to insure a good job. If wall is not true or has holes, or large cracks, plastering should be done to form a smooth, level surface. After wall is prepared, follow these easy steps:

Draw guide lines, using a level, to determine horizontal and vertical starting lines. (Upper left.)
Using a mastic trowel, apply mastic (adhesive) smoothly and in sufficient quantity to insure good coverage on back of tile. (Upper right.)
Begin setting tile in middle of wall at top level line, pressing each firmly into place by applying pressure at corners only. After laying a half-dozen horizontal tiles, lay a vertical row to lower edge of surface to be tiled. This provides accurate alignment and makes a neat appearance. All partial tiles then appear in corners. (Lower left.)
As each row nears corner, stop tiling before corner tile is set. When several rows have reached this stage, place each corner tile, in turn, down the line. Special tile shapes may be used as finishing touches.
After installation, remove excess mastic with soft cloth and suitable cleaner. Do not polish until mastic sets. To polish, wipe with soft cloth dipped in warm water to which liquid detergent has been added (one tablespoon per gallon of water). Allow to dry; polish with dry cloth. (Lower right.)
The result! A hardy, permanent wall covering, yet an attractive one, having a softness of color which blends admirably with any decor.

The \$5,000,000 alumina-from-clay war-time plant in Salem, now owned by the Harvey aluminum interests, may soon be put to use by the owners to produce other products necessary to the nation's aluminum industry.

Lawrence Harvey, vice president of the Harvey Aluminum Company said this week, "There is no question but that it is technically feasible to produce alumina from Willamette Valley clays."

LEGAL INTERPRETATIONS
School boards have the power to adopt supplemental budgets of union high school districts so long as the assessor still has the tax roll and time to make the extension. Other recent opinions by Attorney General Robert Y. Thornton were:

A union high school district cannot, however, without subsequent hearing and supplemental budget, expend revenues for any purpose other than the amount estimated and appropriated in its budget, the attorney general said. Unless provision is made in the budget a school may not lawfully expend revenues which it had not anticipated.

A motor vehicle driver whose license expires during the period for which it was suspended must be charged with driving without a license if he drives his car.

The driver cannot be charged with driving while the license is suspended.

The secretary of state can suspend a drivers license for one year for certain traffic violations such as reckless driving.

CAPITAL SHORTS
"The Battleship Oregon, now a rusting hulk will be sold for scrap because nobody wants her," says Rear Adm. Mumma, chief of the Navy's bureau of ships. California parks officials will be in Oregon early next month to get "pointers" on how to fix up their state parks. A researcher to study the effects of weather

Lonerock Starts New P-TA Group

Enthusiasm ran high when the newly organized chapter of the Oregon state Parent-Teacher association at Lonerock met on Tuesday evening at the Lonerock grange hall.

Presiding at the business meeting was Lester Wick, president, with Mrs. Marjorie Wick secretary. Other officers present included Mrs. Agnes Davis, historian and Mrs. Donna Rogers, program chairman.

Homer Davis was chosen vice-president of the group to succeed Mrs. Mary Ellen Haynes who is at Enterprise where her husband is brand inspector. Homer Davis, newly elected member of the Lonerock school board and Mrs.

on Oregon's forest program has just been put to work. Traffic accidents in Oregon for the first six months of 1955 aggregated 29,476 or 1.278 in excess of the same period last year. "Big" uranium find claimed near Wilhoit, south west of Oregon City.

Marjorie Hueman, teacher, were also present.

The youngest person present was one-year old Stevie Wick, son of the president, and vying for honors of having the largest number of family members present were the Davis's—Mr. and Mrs. Everett Davis, their son, Mr. and Mrs. Homer Davis and Carolyn and Evan. Six Huemans were also present including Frank Jr. who graduated last May from the Grand Meadow, Minnesota high school.

Pupil attendance was 100 percent and earlier in the day the children had set the tables with lace tablecloths, gold and red candleabra, white and gold dishes and garden flowers. Hostesses were Mrs. Marjorie Wick, Mrs. Donna Rogers and Mrs. Lola Davis.

The next meeting of the P-TA will be at the grange hall Tuesday evening, Oct. 4 at 8 p. m. when an exhibit of student work will again be displayed.

State Traffic Deaths Climb During August

A tentative count of 40 traffic deaths during August has pushed Oregon's death toll to 252 for the year thus far. Secretary of State Earl T. Newbry reported Friday.

This is five more fatalities than

the number recorded at the same time last year.

While the rise is following a national upward trend, Newbry pointed out that the worst months of the year for traffic killing are still ahead. He said pedestrian traffic increases during the fall as schools re-open, at the same time darkness comes earlier and poor weather conditions make

for impaired visibility. Drivers must take these factors into account and drive accordingly, the secretary said, if Oregon is to reverse the trend or prevent further increases.

Mr. and Mrs. Raymond Gonty of Tygh Valley visited over the weekend with his parents, Mr. and Mrs. E. E. Gonty.

Farm Truck Boom

ATTACHMENT

PATENT APPLIED FOR

Lifts & Transports Heavy Loads

such as combine headers, plows, discs, weeders, tanks, motors, butchering cattle, etc. Boom can be put on or off your truck in two minutes (after initial installation) regardless of what type of racks are on your truck.

This patent protected idea utilizes the lifting action of your hydraulic dump bed to do its work—you need no old truck with its old-fashioned, expensive winch and tires, batteries, license, anti-freeze, etc., to spend money on.

WE WILL INSTALL

This newly invented farm truck attachment on your truck in our farm shop in two days, by appointment only, for the amazingly low price of

\$149⁰⁰

If any farmer would rather build his own boom using our patent-protected idea we will give permission for you to do so on your own trucks for only \$25 per registered truck owner regardless of the number of trucks owned. Commercial welding shops are not to be given any rights to this invention.

This advertisement and all its implications are to be effective for no longer than 6 weeks from today.
