How Much Are You Worth?

What pay can I expect to get after leaving high school? How much will this increase in the years following? These are questions most frequently asked by seniors about to graduate.

There is a great variation in wages paid to workers, depending on the location, training required, and the job. In a recent study of graduates, beginning weekly wages ranging from a low of \$20 for men and \$17 for women, to a high of \$82 for men and \$65.00 for women.

Graduates who started work in low paying, unskilled jobs tended to receive little increases in pay, while those in skilled vocations their earnings much more.

For instance, the lowest weekly wage for men in the class of 1949, five years after graduation, was \$31. For women, the lowest was \$22 per week. This was almost identical with their beginning pay. However, top salaries for the same group had increased to \$97 for men and \$80 for women.
