OLYMPIA BREWING COMPANY, OLYMPIA, WASH., U. S. A.

A straight pitch for you from Johnny Podres-

the boy who put the joy in Flatbush

He's the power behind the thrown. He's the ball-tosser, of the year!

He's 23-year-old Johnny Podres, miner's son, whose strong left arm whipped the Yankees in the deciding game, of the 1955 World Series.

After all the Series' shouting was over and Brooklyn had settled down to somewhat near normal, a reporter, asked Podres what his plans were. Said Johnny:

"I don't plan to do very much except maybe go out and buy some more U. S. Savings Bonds with my share of the World Series loot."

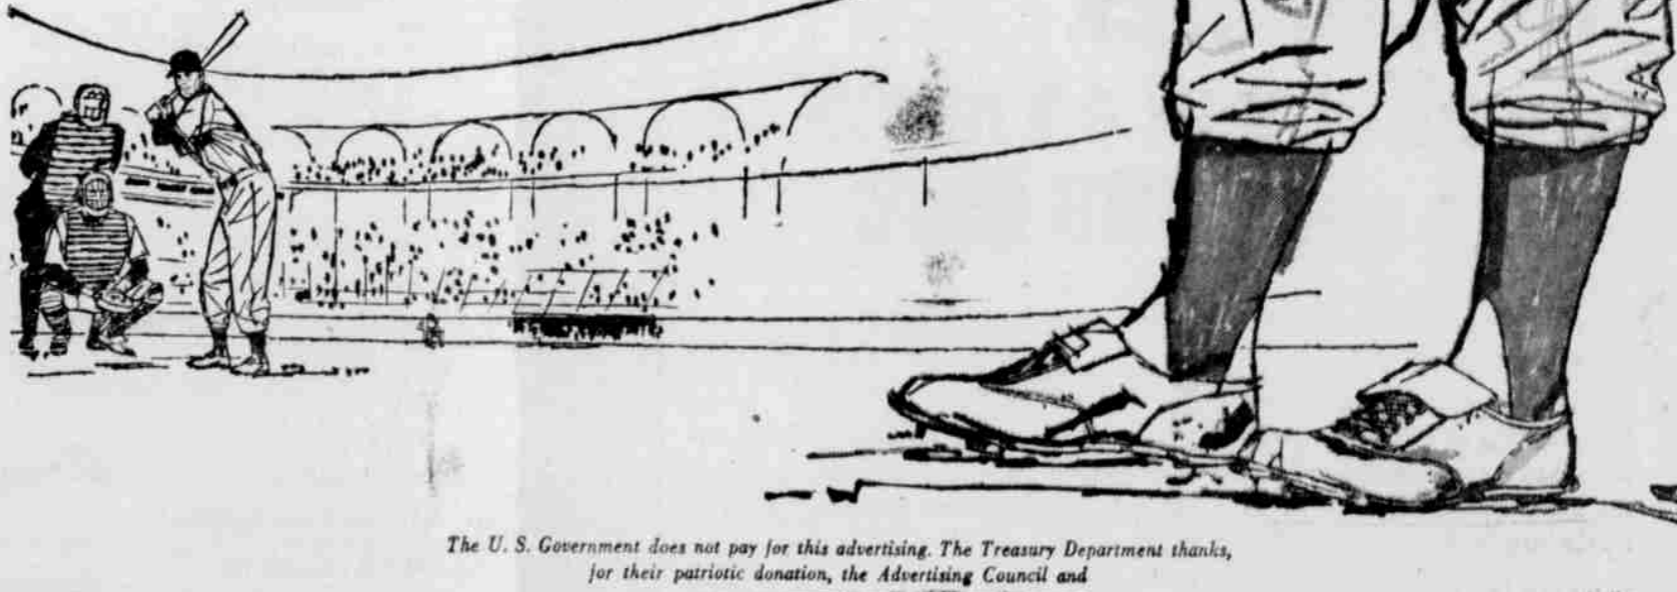

And those were some of the biggest and best plans that Johnny could have made. It's essential for all of us — big sports stars or fans — to be concerned with future financial security. And the best way to insure having it, is to invest your money in U. S. Savings Bonds.

Here's why. Your principal invested in Bonds is safe — not subject to market fluctuations. Your returns are sure — Bonds pay an average of 3% per year, when held to maturity. Your Bonds are liquid savings — you can cash them after 2 months, should an emergency arise.

So take a tip from World Series Star Johnny Podres. Go out and buy some more U. S. Savings Bonds — on the Payroll Savings Plan where you work or at your bank.

For the big things in your life -- be ready with U. S. Savings Bonds
