Standard asphalt research helps bring taxpayers 3 miles of paving for the cost of 2

are more comfortable, get there faster, when you drive on safe, modern roads of sturdy and resilient asphalt.

DIVIDED HIGHWAYS waste motorists' time—and money. To build more miles of better roads at lowest cost, highway engineers turned to asphalt paving for 85% of the nation's roads. They find asphalt costs 30 to 50% less than concrete pavements. It lasts longer, reduces headlight and light glare, provides noiseless, comfortable driving. To meet the nation's highway needs, Standard* has expanded its asphalt production across the country, now operating nine asphalt refineries.

Scientists work with highway engineers on improved construction techniques which save millions of your tax dollars each year. This means more and better roads, for a nation on the move.

Big Torque of the Best Sellers

IT WOULD stand to reason that automobiles selling in the same league, so to speak, would be pretty close in their engineering specifications.

Like in "torque multiplication"—the twisting force a transmission delivers to the drive shaft. (The greater the torque multiplication, the greater the performance).

But what do you find?

You find that any '56 Buick with advanced new Variable Pitch Dynaflo* delivers a higher torque ratio than any standard-production car in America.

And you find that this high-torque performance is one reason for Buick's best-seller standing. For Buick is now more strongly positioned in the Top 3 of the nation's biggest-selling automobiles.

That's news — and there's plenty more where that came from. For the '56 Buick is jam-packed

with new engineering and styling advances to make it the best Buick yet, by far.

That new Dynaflo, for example, brings you the world's only switch-pitch performance in cars—plus a new part-throttle getaway response that's swifter, surer, and a gas-saver to boot.

The new V8 engine is 322-cubic-inches big, and packed with the highest horsepower, the highest compressions in all Buick annals.

There's a joyous new ride, too—a new steering magic—a new "sense of direction" in your every handling maneuver.

Thing to do is come see for yourself. That way you can also look at the prices that have helped move Buick to a new sales success—outselling all other cars in America except two of the well-known smaller ones.

Will you do that, this week?

*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.
