## HERE'S A HOUSE WITH WEARY WIRING...

- Lights dim when appliances go on
- wiring just won't take heavy-duty appliances
- there aren't enough outlets
- fuses blow out
- one appliance has to be unplugged before another can be used

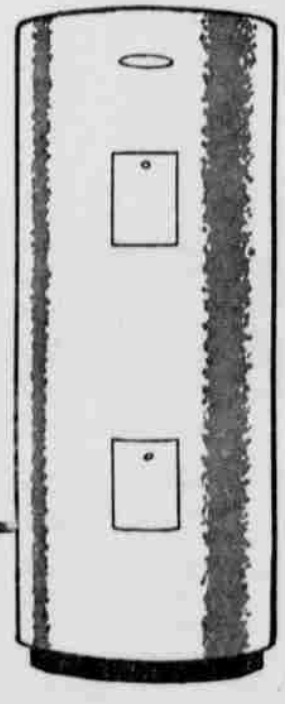

If your house has "weary wiring" then here's the plan for you...  
Reddy Kilowatt's TIME-TO-REWIRE PLAN—for all PP & L customers!

### Pacific Power will completely finance the additional wiring you need for your home

You can pay as little as \$3 a month along with your low monthly electric bill. No money down; take as long as 3 years to pay (maximum contract, \$350). The Time-To-Rewire Plan is your opportunity to better your electric living now. Enjoy the full benefits of efficient, up-to-date wiring and the latest in modern, work-saving electric appliances.

And with the Time-To-Rewire Plan you also can finance the purchase and installation of a new, faster-than-ever electric water heater.\* Here's the modern way to have all the hot water you want all day long. Because of larger capacity electric units, the new "quick recovery" electric water heaters heat water quicker and replace it faster—yet use no more electricity per gallon of hot water than standard types.

\*Purchase and installation of permanent lighting fixtures may also be included in the Time-To-Rewire Plan.

For complete information about the Time-To-Rewire Plan see your appliance dealer, your electrical or plumbing contractor, or stop in at your Pacific Power & Light office.

Use the TIME-TO-REWIRE PLAN and live better... electrically.

### WHAT'S DOING

D. A. Short, your Telephone Manager for Heppner

### A telephone helps plan for pleasure

Here's a picture of a family starting a pleasant weekend vacation trip. And here's how they planned it. His wife called the sports shop to see that their tennis rackets were restrung. She phoned the cleaners, too, about that suit she wanted to wear. And they arranged, by telephone, for the neighbors to feed the cat. He called ahead for reservations and they're off. Sure—this is a special occasion. But even if it's everyday, the telephone is always ready to do so many things, so quickly, and with so much convenience. The men and women of Pacific Telephone work to make your telephone more useful every day.

### Like to take a trip at \$0.0008 a mile?

If you could journey across the nation at the rate of eight-hundredths of a cent a mile, you'd say it was pretty low-cost traveling, wouldn't you? Well, it costs no more to send your voice traveling cross country from right here in town. For only \$2.00 plus tax—that's the station-to-station rate after six o'clock on weekdays and all day Sunday—you can have a friendly three-minute telephone visit that will bridge as many as three thousand miles. Isn't there someone who would like to hear the sound of your voice tonight?

### If you look that number up, it'll never mix you up.

Take just these four numbers: 3-8-4-9. Know how many ways you can mix them up to get different combinations? Maybe you'll be surprised to know there are 24 possible ways to arrange those four digits. Just goes to show how easy it is to get confused about that phone number you thought you knew. So why not make it simple? Look up that number you're not absolutely sure of. You'll save yourself—and other people—lots of time and trouble over wrong numbers. It makes everybody's service more pleasant. Pacific Telephone.
