New Standard plant foods help the West produce better meals at less cost

Progress in the West means...

1956

RICHER SOIL means better crops, yet the West has never had enough soil-building fertilizer. To help meet farmers' needs, Standard opens a \$16 million plant next month which will produce petroleum-derived plant food* in pellet form for Western soils and crops.

This uniform blend of essential plant growth elements is so effective that 400 pounds on an acre of grassland often enables it to feed 3 to 5 times more livestock. On other crops, too, it increases profits per acre. With this better use of Western land, your family will get tastier, more nourishing meals for every budget dollar.

*One of many ORTHO PLANT FOODS, made and sold by Standard's wholly-owned subsidiary, California Spray-Chemical Corp.
