D. A. Short, your Telephone Manager for Heppner

Here's a new voiceway, a coaxial cable that has recently been put into service between Northern and Southern California. It can carry as many as 600 of your telephone calls at one time. Together with our many other microwave and cable routes, the new coaxial cable gives communities all over the Pacific West another important link with one another. And it helps us keep pace with your ever-growing desire for fast, efficient telephone service.

Microwave and coaxial cable, because they carry so many calls at once, not only improve long distance service, they help keep long distance rates low. You can call clear across the country for only \$2.00 plus tax. That's the station-to-station rate for a three-minute call after 6 p.m. weekdays and all day Sunday. Calling long distance is fun. And with rates like this, you can afford to call often.

Flowers by phone is another way the telephone helps you remember special events like birthdays and anniversaries. Just ask your florist to phone your flowers. He'll call to arrange for delivery . . . 50 miles away or across the nation. Florists who offer the service display this emblem: "We speed flowers by telephone." Flowers, plus a long distance phone call, really say, "We're thinking of you." Pacific Telephone.
