## Steel Gray is Spring's New Color

Not a blue tone, but a new tone is this Spring's gray; a bright, high-toned gray, taking its inspiration from the gleaming stainless steel trim on the new model automobiles; a flattering tone, featured in the recent fashion parade at the 1957 New York Automobile Show. Shown here is a stunning cape-topped costume suit designed by Larry Aldrich, and topped by Lily Dache's semicloche banded in actual stainless steel, rolled to minute thinness to make it pliable as cotton. A trick of Dame Fashion's to bring light and movement to gracious living.

ONLY a few dollars more than the price of a smaller car—for a big and brawny Buick! But that's just part of the news.

Do you know this spanking Buick is new from the rubber up?

That it has an all-new body—and a windshield with over 200 square inches of new visibility?

Do you know its roof line is inches lower—yet there's full headroom, legroom, footroom for all six passengers?

All this took some great engineering. But where the engineers went all out was in making this the dream car of the year to drive.

New engine—new Dynaflo\* response—new steering—new ride—more than 150 other chassis changes that make this, in fact, the most completely new Buick in years—offered at a price level that makes it literally true: if you can afford any new car you can afford a Buick.

And what a buy you'll get for your money! See your Buick dealer, take the wheel—and find out.

\*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick build today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.

## Does the Farmer Make the Country, or Does the Country Make the Farmer?

At one time, I was almost convinced that the country makes the farmer—but now, I feel differently.

I have been thinking of the farmers that live in this community, the farmers that come to this yard to buy their building materials, and I have decided that the farmer makes the country.

You have made two blades grow where one formerly grew.

That is why I say the farmers of this community have made it what it is.

Some of you were pioneers—the days were longer then for there were fewer comforts—there were fewer people on the roads.

First, you built a small home, barn or stock shed. Perhaps, you would not call it home today, but it was a protection to your loved ones. And, that is what we call home.

Mother Nature has done her share, for we have had rain, sun and wind. But, without your labor the weeds would overrun the best farm land.

You have taken a lot from the soil this year—a good crop and at top prices.

Let this community of farmers prove beyond a doubt that it is the farmer that makes the country. You can do this by building your wife a new home. She has earned it—a home with conveniences in the kitchen—a home that will save steps—a home that will be economical to build and economical in the arrangements of space.

You have been successful because you worked. We want to prove to you that we can be successful for the same reason.

We all like to be successful. We like to show our neighborhood farmers and business men that we are doing more than our part to live up to what the successful farmer and business man should do.

We will do our part.

Will you do yours?

Will your stock sheds take care of the cattle? Are they warm? And, have you plenty of light in them? Remember, light kills germs, foul odors and makes better, beefier and healthier stock.

How is your fence? We have posts that are as good as a pair of old-fashioned knit socks. Successful farming and a good fence go hand in hand.

Do you need a walk leading from the house to the barn and sheds? Don't track mud into the house. Help keep it clean.

When you come to town with grain and farm products, don't drive home with an empty wagon. Load her up with lumber and coal. Do this now for a car shortage may deprive you of the supplies later on.

Do you need some battens for the barn? Make it as warm as possible. Line the inside with tar paper. Re-hang the old doors that do not fit.

And, by all means, protect your machinery from the weather. You would not allow your automobile to stand out all winter. Then, why leave your implements out?

And, how about the hen house? Make it dry and warm. The chickens will reward you by announcing in their own way "big, big, big, big, big egg. Big egg."

My company is at your service. Come in and talk these things over. We will gladly help you in every way, and remember one price to all. There is at least one grade for the work that will give you the best job for the least amount of money.

We want to play our part in building up good farm buildings, by helping you. By rendering you SERVICE.

All stock is up to grade, bright, fresh and easy to work.

You like this country—we like it—but no town or country will ever be so good we can't improve it.
